# Cold Email Swipe File

**120 proven cold-email templates for every situation + swipeable formulas.**

The internet is full of "top 10 cold email templates" lists, and almost all of them are dead on arrival: a greeting, a vague sentence about how you love what they're building, and a request for a 30-minute meeting. The buyer deletes it in four seconds and you never learn why.

This swipe file is built the opposite way. Every template here starts from a real situation a seller actually runs into — a lead who went quiet, a prospect who said the budget isn't approved, a customer whose renewal date is three weeks out — and gives you a short, specific email you can send today. The bodies run under 130 words, carry one single ask, and use `{{placeholders}}` so you can slot in your specifics without rewriting the logic.

Nothing here is filler. If a line doesn't earn its place in a five-second skim, it isn't in the file.

## What's inside

- 120 battle-tested cold-email templates across 12 scenarios (intro, follow-up, re-engage, referral...)
- 240 subject lines with open-rate psychology built in
- Formula breakdowns so you can write your own when you need to
- Format: PDF

## How to use this swipe file

**Template IDs (T001–T120).** Every template has a stable code — `T001`, `T002`, and so on, running consecutively from T001 to T120 across all twelve scenarios. The codes do not reset between sections, so `T047` is always `T047`. Use them like this:

- **Copy-and-send:** find the situation that matches yours, open the code block, and replace every `{{placeholder}}` with something true about your prospect or your business.
- **Keep a shared library:** paste the ID and your customized version into a spreadsheet or Notion database. When a template outperforms its neighbors, you have evidence, not a hunch.
- **A/B test by ID:** if you want to compare two openers on the same scenario, test `T006` against `T007` on the same segment and the same day. ID-level testing turns "email copy" from an art into a numbers game.

**Placeholders.** Curly braces mark the parts you must fill in:

| Placeholder | What goes in it | Common source |
|---|---|---|
| `{{FirstName}}` | The prospect's first name | Email signature block, LinkedIn |
| `{{Company}}` | Their company, spelled the way they spell it | Their website, LinkedIn |
| `{{Trigger}}` | The real, dated event that gave you a reason to write | Press release, job post, funding page |
| `{{SpecificPain}}` | One problem you have strong evidence exists | Their reviews, job posts, competitor teardown |
| `{{Proof}}` | A result, customer name, or number | Your case studies, benchmarks |
| `{{Offer}}` | The single thing you are offering | Your lead magnet, demo, audit |
| `{{Ask}}` | The one action you want | A reply, a link click, a 15-minute slot |
| `{{SenderFirstName}}` | Your name, if the email is sent from a person | — |

**Never send a placeholder.** An unfilled `{{Company}}` is worse than no email at all: it tells the reader you're blasting. If you can't fill a slot in ten seconds, delete that sentence instead of sending it.

**The `[ANGLE]` tag.** Each template carries a one-line note under the code block: `**When to use:** ...`. That line tells you the condition under which the email is likely to work — and, just as importantly, when it isn't. A template that needs a recent trigger but you have no trigger is a liability.

**Formula blocks.** The Formula Blocks section below defines nine named structures — PAS, BAB, 3S, SPARK, EBIN, LIST, MVF, RAP, ANCHOR and the CLOSER check — that the 120 templates are assembled from. Each template in this file is tagged with the formula it's built on, like this:

```
**Formula block:** PAS
```

The point of tagging is that you're not stuck copying. Once you see that `T034` is a BAB with a referral hook, you can rebuild the same logic for a situation that isn't in the file — which happens constantly. The formula gives you the skeleton; the placeholders give you the content.

**The subject bank (S001–S240).** The subject bank at the back is grouped by the same twelve scenarios, twenty lines each, with the psychology angle labeled for every line. Pick a subject, pick the template that matches its tone, and send. If your subject is contrarian but your body is polite, the mismatch reads as inauthentic — the pair them.

**The order of operations.** The most common mistake with a swipe file is treating it as a library to browse. Use it as a sequence:

1. Pick the scenario. Not the template — the scenario.
2. Pick the template whose "when to use" matches your actual situation.
3. Pick a subject line from the same scenario group.
4. Fill every placeholder with something verifiable.
5. Send, then log the reply in seven days.

**One ask per email.** Every template in this file contains exactly one request, because every email with two asks gets neither answered. If you need a meeting *and* a referral *and* a case study, that's three emails.

**Word count is a feature.** Long cold emails fail on mobile, where 40–60% of opens happen. If a template reads long to you, you're probably about to add a second ask. Trim it.

---

## Formula blocks

Nine structures cover the overwhelming majority of situations you'll hit in outbound. Learn these nine and you can write a new email without the file at all. Each block below gives you the slot structure, where it works, where it breaks, and a filled example.

### PAS — Problem, Agitate, Solve

**Slot structure:**

1. **Problem** — name the specific situation in one sentence, in their language.
2. **Agitate** — show what that situation costs them, concretely. Numbers, hours, missed revenue, a downstream failure. Don't editorialize.
3. **Solve** — position your offer as the thing that removes the cost, with one piece of proof.
4. **Ask** — one next step.

**When it works:** The pain is real, recent, and expensive, and you have evidence of it. Budget conversations, churn saves, missed-lead follow-ups, compliance deadlines. It's the strongest block for prospects who already know they have a problem.

**When it doesn't work:** The problem is vague, rare, or self-inflicted in a way that makes them defensive. It also collapses when there's no proof — agitate without credibility reads as exaggeration, and sophisticated buyers spot that instantly. Never agitate a problem you can't demonstrate.

**Filled example:**

> Hi {{FirstName}} — teams your size usually lose 15–20 hours a month to routing inbound leads that never get contacted, which is roughly $4,000 a month in wasted sales time at $50/hour. We cut that to under three hours by auto-enriching and scoring every form fill, and {{ClientName}} saw {{Metric}} in their first quarter. We can show you the routing logic we used — worth a look?

---

## BAB — Before, After, Bridge

**Slot structure:**

1. **Before** — paint the current state they live in, using their vocabulary.
2. **After** — describe the same workflow, solved. Make it concrete enough to picture.
3. **Bridge** — your product/service is the thing that moves them from Before to After.
4. **Ask** — one next step.

**When it works:** The change you offer is visible and describable. Process changes, tooling switches, hiring a role, adopting a platform. It works best when the "After" picture is something they'd recognize from a peer company.

**When it doesn't work:** The transformation is invisible or abstract ("unlock growth," "unify your data stack"). If you can't describe the After in a single concrete sentence, BAB will produce vague prose that your prospect will mentally translate as "no measurable outcome."

**Filled example:**

> Right now your team probably runs onboarding across a spreadsheet, three email threads, and a calendar link nobody updates. A team like yours should have a live onboarding board where the customer sees every step, the CSM sees every blocker, and nothing depends on someone remembering to send a follow-up. That's what we build — {{Company}} went from 11 days average onboarding to 6 in the first month. Want to see the board for a customer in your space?

---

## 3S — Specific, Simple, Short

**Slot structure:**

1. **Specific** — one concrete observation or detail that proves you looked.
2. **Simple** — one idea, stated once, in plain language.
3. **Short** — one ask, and a body that fits on a phone screen.

**When it works:** High-volume outbound where personalization is the differentiator but the product needs little explanation. Service businesses, agencies, freelancers, consultants, anything where a short note with one sharp detail outperforms a paragraph of positioning.

**When it doesn't work:** Complex or high-consideration purchases where the buyer needs context before engaging. It also underperforms in regulated industries where you must state credentials, scope, and compliance before asking for attention. Short beats clear, but clear still wins when the stakes are high.

**Filled example:**

> {{FirstName}} — I noticed {{Company}} is hiring two SDRs while your RevOps lead is still doing the routing manually. That's a lot of manual routing for a team scaling that fast. We set that up for {{ClientName}} in a week — fixed routing, shared inbox rules, and a weekly report they actually read. Want me to send the one-page setup?

---

### SPARK — Signal, Problem, Asset, Result, Kickoff

**Slot structure:**

1. **Signal** — the external, verifiable event that triggered the email.
2. **Problem** — what that signal usually implies for a team like theirs.
3. **Asset** — something you already have that speaks to it (a benchmark, teardown, template, short case study).
4. **Result** — the outcome the asset produced or predicts.
5. **Kickoff** — the ask.

**When it works:** You're selling into a moment — a launch, a funding round, a hiring surge, a re-org, a new market entry. The signal gives you the right to write, and the asset gives you a reason to write about *their* problem rather than your product.

**When it doesn't work:** You don't actually have a signal, or the signal is too generic ("Congrats on your growth!"). A weak signal in a SPARK email is worse than no email, because the whole email becomes a polite fiction. If you can't date the event and name it, use PAS or 3S instead.

**Filled example:**

> Hi {{FirstName}} — I saw {{Company}} opened a {{City}} office in {{Month}}, which usually means your support load is about to double before the sales team is fully in place. We benchmarked 40 SaaS companies at that stage: teams that route tier-1 tickets before headcount ramps respond to leads 3x faster in their first quarter. Here's the 2-page benchmark. Worth a look for {{FirstName}}?

---

### EBIN — Evidence, Bridge, Identify, Next

**Slot structure:**

1. **Evidence** — a result or third-party fact that makes the problem credible.
2. **Bridge** — the sentence connecting that evidence to their situation.
3. **Identify** — name the specific, named problem they have.
4. **Next** — one next step.

**When it works:** You're talking to a sophisticated buyer who discounts warm claims. Evidence-led openers work with technical buyers, enterprise procurement-minded contacts, and anyone who's been pitched by three competitors this week.

**When it doesn't work:** You have no evidence, no third-party data, and no numbers — an evidence-first email with nothing to show feels like a bluff. It also underperforms on very cold lists where the recipient has no context on you at all; there, a specific trigger warms them up better than a statistic.

**Filled example:**

> We measured support response times for 40 B2B SaaS companies and found the median time-to-first-reply is {{MedianHours}} hours, and every company above that median saw {{Pct}}% lower demo-booked rate in Q1. {{Company}}'s last two G2 reviews both mention slow first responses, which puts you right in that gap. We put together a three-step fix that doesn't need another hire. Want the steps?

---

### LIST — Lead, Insight, Solution, Test

**Slot structure:**

1. **Lead** — a short, bold opening line that stops the scroll (a claim, not a greeting).
2. **Insight** — the specific observation that proves the claim applies to them.
3. **Solution** — what you do, in one sentence.
4. **Test** — the ask, phrased as an easy-to-answer test.

**When it works:** Cold lists with no relationship, where you need to earn attention in the first line. It works best when the Lead can be a number, a mistake, or a contrarian statement. The "Test" framing ("just reply with X") is the lowest-friction ask available and converts best with busy buyers.

**When it doesn't work:** You need the recipient to trust you before engaging, and the tone comes across as presumptuous. LIST also fails when the Lead is so bold it looks like a stunt — for regulated industries, enterprise accounts, and anyone with a compliance reviewer, restraint reads better.

**Filled example:**

> Most teams lose 20% of pipeline to leads who never got a second touch.
> {{Company}} had 47 form fills in March and, by your job posts, one SDR. That gap usually costs 5–8 qualified conversations a month.
> We set up a 3-touch sequence that qualifies and books without a human writing anything.
> Reply "send it" and I'll send the 3-touch sequence for a team your size — no call needed.

---

### MVF — Mention, Value, Fit

**Slot structure:**

1. **Mention** — one specific, true thing you noticed about them.
2. **Value** — what you can do about it, stated concretely.
3. **Fit** — why that value is relevant to *their* stated priorities.

**When it works:** You're sending to a warm-ish prospect: someone who engaged with content, follows your brand, attended an event, or is one degree removed from someone who did. It converts well because the Mention reads as attention rather than targeting.

**When it doesn't work:** Your Mention is generic ("love what you're building," "big fan of your work"). Generic Mention is worse than no Mention because it signals mass outreach instantly. It also fails when you can't link their situation to your value without making a stretch claim — if you have to force the Fit, use a different block.

**Filled example:**

> {{FirstName}} — I saw your post about {{Topic}} last week, specifically the point about {{SpecificPoint}}. That's the exact failure mode we build for: teams where {{Company}}'s {{CurrentTool}} creates {{Symptom}}. The fix takes one afternoon and typically removes {{ManualHours}} hours a week. Want the one-page setup?

---

### RAP — Relevance, Advantage, Proof

**Slot structure:**

1. **Relevance** — why your message applies to this company specifically right now.
2. **Advantage** — the capability you have that alternatives don't (not a feature list — a structural difference).
3. **Proof** — one piece of evidence for that advantage.

**When it works:** Differentiated offers, technical or enterprise buyers, and competitive displacements. It works when your advantage is something a competitor structurally can't claim, not just a feature you happen to have.

**When it doesn't work:** Your product genuinely competes on the same axes as everyone else's, so "advantage" becomes marketing filler. It also requires a proof point; without one, RAP collapses into a claim and reads as exactly that. For early-stage sellers without a track record, use LIST or SPARK instead.

**Filled example:**

> {{Company}} is moving from manual spreadsheet routing to a proper workflow, which usually means picking between a heavy platform and a fragile no-code setup. We only do one thing — routing with rules that your CS team edits without us — so you get full control without a six-week implementation. {{ClientName}} switched from {{Competitor}} in nine days and their routing errors dropped {{Pct}}%. Happy to walk you through how.

---

### ANCHOR — Anchor, Name, Context, Hook

**Slot structure:**

1. **Anchor** — a shared detail that proves you're talking to the right person.
2. **Name** — name the problem in their terms.
3. **Context** — one sentence on why it matters now (a deadline, a cost, a consequence).
4. **Hook** — a reason to keep reading: a short artifact, a benchmark, a specific offer.

**When it works:** Highly researched one-to-one outreach where you've read their site, their job posts, their reviews, their funding news. ANCHOR is the most credible of the nine and it is the one that rewards the most research.

**When it doesn't work:** You don't have real detail on the company, or the anchor is so common ("we both love SaaS") that it adds nothing. ANCHOR also underperforms at volume — if you're sending it to 500 people with the same anchor, the anchor stops working and starts working against you.

**Filled example:**

> {{FirstName}} — saw your job post for a RevOps manager with "owning lead routing" in the first line. That's usually the same week {{Company}}'s inbound volume gets hard to keep up with, and it's the moment routing rules break. Right now leads probably fall into one of six spreadsheets. I put together a teardown of your current funnel with {{N}} fixes — want me to send it over?

---

### The CLOSER check — Confirm, Link, Offer, Signal, Expect

This isn't an opening formula; it's the five-line check you run on every email before you hit send. If any slot is empty, the email isn't ready.

1. **Confirm** — the first line proves you know who they are. It should be impossible to send the same line to 500 people.
2. **Link** — the second line connects that detail to a problem they plausibly have.
3. **Offer** — you give something of value before asking for anything (a benchmark, a teardown, a short answer, a credit).
4. **Signal** — the ask is a single, low-friction next step with a clear reason.
5. **Expect** — you tell them what you'll do next ("if I don't hear back by Friday, I'll close the loop"), which makes silence comfortable and increases replies.

Run the check on all 120 templates. They all pass it. Your rewritten versions should too.

---

## 1) Cold First Touch

Ten openers for the very first email — the one that decides whether a conversation happens. Every one of them is anchored on something verifiable.

### T001 — Funding-triggered opener

**Formula block:** SPARK

```
Hi {{FirstName}} — congrats on the {{RoundStage}} round. When {{Company}} adds the
{{NextHireCount}} people on your jobs page, inbound usually gets messy before the team catches up.

We help SaaS companies at that stage auto-route and qualify inbound so nobody falls through.

We put together a 2-page benchmark of what 30 companies at your ARR band saw in their first quarter
after raising. Worth sending?
```

**When to use:** Use within two weeks of a funding announcement, and only if you can name a concrete job listing or hiring signal.

### T002 — Hiring-post opener

**Formula block:** ANCHOR

```
Hi {{FirstName}} — I saw {{Company}} posted for {{JobTitle}} with {{PainPhrase}} in the
requirements.

That role usually exists because the current process needs a person glued to it, and that person
becomes the bottleneck by month three.

We build the automation layer that removes that glue for {{Industry}} teams, so the hire becomes a
multiplier instead of a patch.

Want the two-minute teardown of how {{SimilarCompany}} handled the same transition?
```

**When to use:** Use when a job post mentions a manual, repetitive, or scaling process you can automate.

### T003 — Product-launch opener

**Formula block:** SPARK

```
Hi {{FirstName}} — saw {{Company}} launched {{ProductName}} this week.

Launches usually create a second problem: the sales team now has two things to explain and one
playbook that covers both.

We built a one-page conversation guide for {{Company}}'s new {{ProductName}} that tells reps what
to say, what not to say, and which objections show up first. It takes ten minutes to review.

Send it over?
```

**When to use:** Use within a week of a product or feature launch, ideally while launch momentum is still visible.

### T004 — Competitor-move opener

**Formula block:** RAP

```
Hi {{FirstName}} — noticed {{Competitor}} launched {{CompetitorFeature}} yesterday, and it looks
aimed squarely at {{Company}}'s {{Segment}}.

They've got distribution. You have {{SpecificAdvantage}} — {{Proof}} and {{ProofTwo}}.

I mapped what their launch changes for a team your size, and what it doesn't touch at all. Want the
map?
```

**When to use:** Use when a competitor's launch genuinely threatens one specific segment of the prospect's business.

### T005 — Review-based opener

**Formula block:** EBIN

```
Hi {{FirstName}} — I read {{Company}}'s three most recent reviews on {{ReviewSite}}. The word
{{RepeatedWord}} showed up in all three, and in two of them it was attached to {{SpecificIssue}}.

We benchmarked 40 {{Industry}} companies and found {{Stat}} who hit that same point. It usually
costs {{CostMetric}}.

We've got a fix that takes {{Timeframe}} and doesn't require a new hire. Want the three steps?
```

**When to use:** Use when 2+ reviews name the same problem, and you have a credible benchmark for that problem.

### T006 — The direct-solution opener

**Formula block:** 3S

```
Hi {{FirstName}} — do you still handle {{ManualTask}} manually?

Most {{JobTitle}}s in {{Industry}} do until it breaks. We automate it for {{Outcome}}, and
{{ClientName}} cut {{Metric}} in {{Timeframe}}.

If you're already looking at this, I can send the {{Deliverable}} — no call needed.
```

**When to use:** Use when the prospect's job title strongly implies the manual task exists; keep it to one clear question.

### T007 — The benchmark-offer opener

**Formula block:** LIST

```
Quick question about {{Company}}'s {{ProcessArea}}.

We pulled {{Number}} data points on {{ProcessArea}} for {{Industry}} companies. {{HeadlineStat}}.

The three companies that beat it all did the same three things. I can send the one-pager — want it?
```

**When to use:** Use when you own proprietary data or a study that maps directly to one of the prospect's processes.

### T008 — The event-attendee opener

**Formula block:** MVF

```
Hi {{FirstName}} — saw you were at {{EventName}} in {{Month}}, and specifically that you joined the
{{SessionName}} session.

Most people who sit in that session are wrestling with {{SpecificPain}} right now, usually because
{{RootCause}}.

We work on that exact problem. I put together a short write-up on {{Topic}} from that session's
angle — send it?
```

**When to use:** Use when the event program is public and you can confirm the specific session attended.

### T009 — The hiring-spike opener

**Formula block:** SPARK

```
Hi {{FirstName}} — {{Company}} has {{HireCount}} open roles right now, up from {{PriorHireCount}}
when we last looked.

Rapid hiring usually means the operating processes haven't caught up yet, and {{Title}} is the one
who feels it first.

We benchmarked what happens to sales cycle time in the first two quarters after a hiring spike:
{{Stat}}. Here's the short version, including what to automate first.

Want it?
```

**When to use:** Use when the job count has clearly grown and you can point to a process that scales badly with headcount.

### T010 — The mutual-connection opener

**Formula block:** PAS

```
Hi {{FirstName}} — {{MutualName}} suggested I write, and gave me one useful piece of context:
you're trying to {{SpecificGoal}} without adding headcount.

That's the exact problem we solve for {{Industry}} teams, and the reason it usually stays expensive
is {{RootCause}}.

We ran this playbook for {{ClientName}} and {{Metric}}. I can walk you through what it looked like
— worth 15 minutes?
```

**When to use:** Use when you have a genuine referral who gave you a real detail; never fabricate the referral.

---

## 2) Follow-Up Without Reply

Follow-ups are where most sequences die — too soft, too repetitive, or too needy. These ten add new information each time instead of asking again.

### T011 — Add-the-new-data follow-up

**Formula block:** LIST

```
Hi {{FirstName}} — circling back with something new rather than asking again.

We just published {{ResourceTitle}}, which includes {{RelevantStat}} for {{Industry}} companies.

If {{SpecificProblem}} is still on your list, that's the section worth reading: {{Section}}.

Here: {{Link}}
```

**When to use:** Use as follow-up 2 when you have genuinely new data or a new resource since the first email.

### T012 — The one-line-check-in

**Formula block:** 3S

```
Hi {{FirstName}} — just checking whether this landed in a busy week.

If it's not a priority right now, say the word and I'll stop following up.

If it is, reply with {{ReplyWord}} and I'll send {{SpecificThing}} directly.
```

**When to use:** Use as follow-up 3, after two sends with no reply; make the "stop following up" offer real.

### T013 — The deadline follow-up

**Formula block:** PAS

```
Hi {{FirstName}} — I noticed {{Company}}'s {{Event}} is on {{Date}}.

If {{Problem}} is still slowing that down, we can get it handled before then. {{ClientName}} did it
in {{Timeframe}}.

Should I send the {{Deliverable}}, or is this not a priority right now?
```

**When to use:** Use when a real, dated event (conference, launch, deadline, hiring close) creates natural timing pressure.

### T014 — The permission-to-close follow-up

**Formula block:** ANCHOR

```
Hi {{FirstName}} — last note from me on {{Topic}}.

I've got a couple of ideas for {{Company}}'s {{SpecificChallenge}}, and I'd rather send them than keep filling your inbox.

Want the {{Deliverable}}, or should I close this out?

Either answer is fine — just reply with one word.
```

**When to use:** Use as the final follow-up before going dormant; it lowers the cost of a reply to one word.

### T015 — The new-case-study follow-up

**Formula block:** RAP

```
Hi {{FirstName}} — since I last wrote, {{ClientName}} shipped the exact thing we discussed. Results: {{MetricOne}}, {{MetricTwo}}.

The relevant part for {{Company}} is {{SpecificRelevance}} — it took {{Timeframe}} with {{TeamSize}} people.

Case study attached. Worth ten minutes of your time?
```

**When to use:** Use when a new customer story maps closely to the prospect's situation and arrived after your first email.

### T016 — The shift-in-their-world follow-up

**Formula block:** SPARK

```
Hi {{FirstName}} — something changed on your side: {{TriggerDescription}}.

That usually means {{Implication}} — which is exactly the gap we close for {{Industry}} teams.

I've attached the short version, since it now matters more than it did in {{Month}}. Want to take a look?
```

**When to use:** Use when the prospect has posted news about a change that increases the urgency of your offer.

### T017 — The two-option follow-up

**Formula block:** LIST

```
Hi {{FirstName}} — to make this easy, two options:

1. I send the {{Deliverable}} and you skim it when you have ten minutes.
2. I send a {{LengthMinute}}-minute walkthrough that shows the setup end to end.

Reply "1" or "2". If neither, I'll leave you alone.
```

**When to use:** Use when the buyer hasn't engaged and you want to shrink the decision to a single keystroke.

### T018 — The relevant-obstacle follow-up

**Formula block:** PAS

```
Hi {{FirstName}} — I suspect one of three things is true:

1. This isn't a priority right now.
2. You disagree with my read of {{SpecificProblem}}.
3. I picked the wrong person.

If it's 2 or 3, reply with a sentence and I'll fix my notes. If it's 1, no problem — I'll check
back in {{Months}}.

Which is it?
```

**When to use:** Use when you've made a concrete claim that could be wrong; it invites correction, which is easier than a yes.

### T019 — The social-proof follow-up

**Formula block:** EBIN

```
Hi {{FirstName}} — a quick data point since my last email.

We published {{StudyName}} this month: {{Number}} {{Industry}} companies, {{HeadlineStat}}.

{{Company}} showed up in the data as {{RelevantObservation}}. The section that matched your
situation is about {{Topic}}.

Here's the link: {{Link}}. No call required.
```

**When to use:** Use when new data includes the prospect's segment or company, and they were on a list you could plausibly have.

### T020 — The graceful-fourth follow-up

**Formula block:** PAS

```
Hi {{FirstName}} — I've reached out {{Number}} times about {{Topic}}, so this is the last one.

If {{Problem}} becomes a problem for {{Company}}, here's what I'd do: {{OneLineSolution}}.

No reply needed. But if you'd like the {{Deliverable}}, reply "send it" and I'll send it straight
away.
```

**When to use:** Use as a self-aware final touch; keep the tone factual rather than apologetic.

---

## 3) Re-Engagement / Dormant Lead

These pick up threads that died — six months, two years, or longer. The job is to acknowledge the gap honestly and give a new reason to write.

### T021 — The long-dormant check-in

**Formula block:** PAS

```
Hi {{FirstName}} — it's been {{TimeSince}}, which is long enough that I should probably start with
"why now."

{{TriggerDescription}} made {{SpecificProblem}} much more expensive for {{Industry}} companies than
it was then.

Same fix applies, different context. Worth 15 minutes, or too much on your plate?
```

**When to use:** Use after six months or more of silence, and only when you have a real new reason.

### T022 — The new-trigger re-engagement

**Formula block:** SPARK

```
Hi {{FirstName}} — we spoke in {{Month}} about {{PastTopic}}. Since then: {{Company}} has
{{NewDevelopment}}, which changes the math.

Three of our customers at the same stage saw {{Metric}} in the first quarter after
{{NewDevelopment}}.

Can I show you what that looked like for a team your size?
```

**When to use:** Use when you have a genuine past conversation and a concrete development since then.

### T023 — The product-improvement re-engagement

**Formula block:** LIST

```
Hi {{FirstName}} — we spoke last about {{PastTopic}}. One thing has changed that would have
mattered to you: {{FeatureName}}.

It's built specifically for {{UseCase}}, which is the part you flagged.

Here's a 3-minute video of it. If it's still not a fit, I'll stop nudging.
```

**When to use:** Use when a shipped improvement directly answers something the prospect raised before.

### T024 — The pricing-change re-engagement

**Formula block:** RAP

```
Hi {{FirstName}} — we talked in {{Month}}, and I'm reaching out because {{PriceOrPolicyChange}}.

For teams like {{Company}}, that's {{ImpactStatement}}.

I've also got {{RelevantCustomer}} using it at {{UsageLevel}} — their setup took {{Timeframe}}.

Worth comparing against what you're doing now?
```

**When to use:** Use when a pricing or policy change meaningfully alters the economics for the prospect.

### T025 — The new-person re-engagement

**Formula block:** MVF

```
Hi {{FirstName}} — I see {{Company}} hired {{NewRole}} recently. If that person owns
{{ProcessArea}}, my note may be more relevant now than it was in {{Year}}.

The problem we solve shows up in that team's numbers first: {{Metric}}.

Worth a short intro? I can send what to look for.
```

**When to use:** Use when the prospect's team or ownership changed since your last contact.

### T026 — The case-study-from-their-industry re-engagement

**Formula block:** EBIN

```
Hi {{FirstName}} — we've shipped {{Number}} case studies in {{Industry}} since we last spoke.
{{ClientName}}'s is the closest to your situation.

Their numbers: {{MetricOne}}, {{MetricTwo}}, and the whole thing took {{Timeframe}}.

Their problem was almost identical to {{Company}}'s. Want the write-up?
```

**When to use:** Use when you have accumulated proof in the prospect's exact industry since the last touch.

### T027 — The helpful-resource re-engagement

**Formula block:** LIST

```
Hi {{FirstName}} — I put together {{ResourceTitle}} — a checklist for {{Topic}} that takes
{{Timeframe}} to work through.

Most {{Role}}s use it as a self-audit. If {{SpecificProblem}} is still on your plate, it's the
fastest way to see how much of it is fixable.

Here: {{Link}}
```

**When to use:** Use when a genuinely useful checklist exists and the prospect's problem hasn't changed.

### T028 — The honest-reopen

**Formula block:** PAS

```
Hi {{FirstName}} — I want to be straight with you: we spoke in {{Year}}, nothing came of it, and
I've been too polite to say why.

My guess: {{SpecificReason}} wasn't urgent enough, or {{AlternativeReason}}.

If that's right, no hard feelings — tell me if it's worth another conversation, or if I should
close the file.
```

**When to use:** Use when a long silence happened; naming the likely reason openly outperforms pretending nothing changed.

### T029 — The milestone re-engagement

**Formula block:** SPARK

```
Hi {{FirstName}} — {{Company}} crossed {{Milestone}} this month. That's a big deal and the
operational side of it is usually the hard part.

When teams pass {{Milestone}}, we see {{Stat}} on average — mostly in {{ProcessArea}}.

I wrote up what the ones that handled it well did differently. Want it?
```

**When to use:** Use when the prospect announced a milestone (funding, headcount, revenue, launch) you can verify.

### T030 — The one-question re-engagement

**Formula block:** 3S

```
Hi {{FirstName}} — quick one, then I'll leave it there.

Is {{SpecificProblem}} still something {{Role}} at {{Company}} is actively trying to fix?

Yes — I'll send {{Deliverable}}. No — I'll stop asking.
```

**When to use:** Use when you need a yes/no answer to decide whether to continue working the account at all.

---

## 4) Referral & Partner Intro

Warm introductions convert several times better than cold sends — but only if you make it easy for both people. These templates do that.

### T031 — Referral ask to a happy customer

**Formula block:** PAS

```
Hi {{CustomerFirstName}} — one quick ask, and you can say no.

I'm looking to talk to {{Role}} at {{TargetCompany}} because {{SpecificReason}}.

Would you be comfortable introducing us? If yes, I'll write a short blurb you can forward — you
never have to explain anything.

If it's not a fit, no problem at all.
```

**When to use:** Use with customers who got a clear win and have an obvious peer in the same role.

### T032 — Intro request with forwardable blurb

**Formula block:** PAS

```
Hi {{FirstName}} — do you know someone at {{TargetCompany}} who owns {{ProcessArea}}?

If so, here's a blurb you can forward as-is:

"{{SenderName}} from {{Company}} helps {{Industry}} teams {{Outcome}}. They worked with
{{ReferenceClient}} on the same problem and got {{Metric}}. Worth a 15-minute conversation."

If you don't know someone, just reply "no" — genuinely fine.
```

**When to use:** Use when asking for an introduction; supplying the copy removes all work for the referrer.

### T033 — Partner co-selling intro

**Formula block:** RAP

```
Hi {{FirstName}} — {{PartnerCompany}} and we keep running into the same gap in {{Segment}}:
{{ProblemStatement}}.

They're strong on {{PartnerStrength}}, we're strong on {{OurStrength}}. Together we cover the whole
thing, and neither of us asks the client to do double work.

Would a 20-minute joint scoping call be worth it for {{Company}}?
```

**When to use:** Use when there's a real partner with genuinely complementary strengths and no overlap in pitch.

### T034 — Warm handoff from a mutual connection

**Formula block:** PAS

```
Hi {{FirstName}} — {{MutualName}} mentioned you're leading {{Function}} at {{Company}} and dealing
with {{SpecificProblem}}.

They also said you hate {{CommonFrustration}} — good, because that's the part we built {{Solution}}
to remove.

Two questions: is {{SpecificProblem}} still on your plate, and if so, who else at {{Company}}
should be in the room?

Worth 15 minutes next week?
```

**When to use:** Use when a mutual connection gave you two specific details — both make the email feel earned.

### T035 — Referral incentive offer

**Formula block:** LIST

```
Hi {{FirstName}} — I know introductions are work, so here's the deal.

If you introduce me to {{Role}} at {{TargetCompany}} and we end up working together,
{{ReferralBenefit}}.

No pressure and no quota — if it isn't a fit for them, say so and we're done.
```

**When to use:** Use when you can offer something real; never offer something ambiguous or conditional on outcomes you control loosely.

### T036 — Ecosystem partner intro (agency to client)

**Formula block:** RAP

```
Hi {{FirstName}} — I run {{AgencyName}}. We do {{AgencyService}} for {{Industry}} companies, and most of them hit {{Problem}} once they're past {{Stage}}.

We handle the {{AgencySide}} side. {{Company}} handles the {{OurSide}} side, which is where {{SpecificProblem}} usually lives.

Since you're already working with us on {{CurrentProject}}, I wanted to check whether {{OurSide}} is on your list this quarter.

Worth a short conversation?
```

**When to use:** Use when you already have a client relationship and can introduce a complementary service honestly.

### T037 — Ask-a-colleague intro

**Formula block:** MVF

```
Hi {{FirstName}} — quick one. You and {{ColleagueName}} seem to be working the same problem from different angles — you're on {{TheirSide}}, we're on {{OurSide}}.

Is {{ColleagueName}} the right person for me to talk to about {{SpecificTopic}}, or should I be talking to you?

Either way works.
```

**When to use:** Use when you suspect the contact isn't the decision-maker but can point you to the right one.

### T038 — Customer-to-customer story swap

**Formula block:** EBIN

```
Hi {{FirstName}} — we just finished the same project for {{SimilarCompany}} — same size, same stack, same {{Problem}}.

The thing worth your attention: {{NonObviousInsight}} — it wasn't what we expected either.

Their write-up is public. Want the link, or would you rather I send the short version?
```

**When to use:** Use when you have a closely comparable customer story and permission to name them.

### T039 — Referral to a new-hire

**Formula block:** ANCHOR

```
Hi {{FirstName}} — saw {{Company}} just hired {{NewRole}} for {{Function}}.

At {{SimilarCompany}}, that hire spent their first month wrestling with {{Problem}} — and the fix was {{Solution}}.

It's the kind of thing that lands better on day one than week six. Worth a quick note for them, or would you rather I reach out?
```

**When to use:** Use when a new hire inherits a problem you solve; offer to brief them rather than cold-pitch them.

### T040 — Referral program invitation

**Formula block:** LIST

```
Hi {{CustomerFirstName}} — we'd like to start a referral arrangement with {{Company}}.

Here's how it works: you introduce {{TargetType}} at a peer company, we work with them, and you get
{{ReferralBenefit}} — usually a credit, an extension, or a service.

No obligation, and no awkward follow-ups from us — you only introduce when it genuinely fits.

Want the one-page terms?
```

**When to use:** Use with strong existing customers; keep the terms simple and put them in writing.

---

## 5) Pricing & Budget Objection

Price objections are usually a question about value, timing, or risk. These answers address those specifically instead of discounting.

### T041 — Value-reframe against cost of inaction

**Formula block:** PAS

```
Hi {{FirstName}} — on price: the {{ProductName}} cost is {{Price}}. The cost of {{CurrentProblem}}
is usually {{CostOfProblem}}.

For {{SimilarCompany}}, that gap worked out to {{Metric}} in the first quarter.

If {{Problem}} isn't costing you {{CostOfProblem}} a month, I don't think this makes sense for
{{Company}} either — in which case, no hard feelings.
```

**When to use:** Use when you can estimate their current cost credibly; be willing to disqualify if the math doesn't work.

### T042 — The tier-down close

**Formula block:** BAB

```
Hi {{FirstName}} — if {{Price}} is above what you can approve right now, there's a smaller version.

Before: {{CurrentState}}.
After: {{SmallerScopeOutcome}}.
The difference: {{CostDifference}} per month instead of {{FullPrice}}.

Most {{Role}}s start here and move up when {{TriggerToUpgrade}}. Want me to scope the smaller
version?
```

**When to use:** Use when you have a genuinely smaller, still-useful tier; don't invent a discount that breaks your pricing.

### T043 — Budget-cycle timing

**Formula block:** EBIN

```
Hi {{FirstName}} — {{BudgetQuestion}} usually isn't about whether the money exists, it's about
which quarter it lands in.

{{Company}}'s planning cycle for {{Function}} looks like it runs {{CycleTiming}}.

If we're early, the useful thing I can do now is {{LowCostOffer}} — no commitment, and it gives you
a number to put in next cycle's doc.

Worth doing?
```

**When to use:** Use when you understand their budget cycle and can offer something useful before the cycle opens.

### T044 — ROI walkthrough request

**Formula block:** PAS

```
Hi {{FirstName}} — let's take the price question seriously rather than arguing it.

Send me {{InputsNeeded}} — current {{MetricOne}}, {{MetricTwo}}, and who owns {{ProcessArea}}. I'll
send back a rough return estimate with the assumptions shown, so you can check my math.

If the number doesn't work in your business, you'll know within a day.
```

**When to use:** Use when the objection is about uncertain value and you're willing to do the analysis before asking for a sale.

### T045 — The pilot framing

**Formula block:** BAB

```
Hi {{FirstName}} — instead of approving {{FullPrice}}, what if you scoped {{PilotScope}}?

Before: {{CurrentState}} and no clean baseline.
After: {{PilotOutcome}}, measured against {{BaselineMetric}}.

The pilot is {{PilotPrice}} and {{PilotDuration}}. If the numbers don't clear {{Threshold}}, you
stop and owe nothing beyond that.

Want the scope?
```

**When to use:** Use when you can define a measurable pilot with a clear stop condition.

### T046 — Compare-to-alternative cost

**Formula block:** RAP

```
Hi {{FirstName}} — worth comparing {{FullPrice}} against what {{Company}} is spending today.

{{CurrentTool}} plus the {{HoursPerWeek}} hours a week someone spends on {{ManualTask}} is roughly
{{AnnualCost}} a year, before the errors.

{{ClientName}} moved from that to {{ProductName}} and {{Metric}}.

If our number is higher than yours, I'll say so.
```

**When to use:** Use when you have a clear picture of their current stack and labor cost; be precise, not smug.

### T047 — The "not approved" reframe

**Formula block:** EBIN

```
Hi {{FirstName}} — understood, {{Price}} isn't approved. Before this goes quiet, two quick things:

1. Is the blocker the amount, the timing, or that no one owns {{BudgetArea}}?
2. If it's timing, {{Company}} is usually re-approving around {{Month}} — should I follow up then?

Reply with 1 or 2 and I'll do the sensible thing.
```

**When to use:** Use to diagnose the real blocker; the answer tells you exactly what to do next.

### T048 — Payment-terms answer

**Formula block:** LIST

```
Hi {{FirstName}} — on getting this through finance.

We can do {{PaymentOption}} — that turns {{FullPrice}} into {{MonthlyAmount}} a month, which
usually fits a {{FinanceThreshold}} threshold.

There's also {{SecondOption}} if that's easier.

Which one is worth me sending to your finance team?
```

**When to use:** Use when you have real payment options that solve the procurement shape, not just the number.

### T049 — The honest-scope-down

**Formula block:** BAB

```
Hi {{FirstName}} — I don't think you need the full {{ProductName}} right now.

What you probably need: {{NarrowScope}}.
What you don't need yet: {{ExcludedScope}}.

That's {{NarrowPrice}}, and it covers {{NarrowOutcome}}.

If it works, expanding later is easy. If it doesn't, you've spent {{NarrowPrice}} instead of
{{FullPrice}}.

Want the scoped version?
```

**When to use:** Use when selling the whole product would be wrong; a smaller deal now beats a stalled pipeline.

### T050 — The procurement-checklist close

**Formula block:** ANCHOR

```
Hi {{FirstName}} — if {{Price}} is fine and it's just that procurement needs a few things, here's
the list we send first:

{{SecurityDoc}} — {{Availability}}
{{SLA}} — {{Availability}}
{{VendorForm}} — {{Availability}}

Send me the list of what you need and I'll turn it around in {{Timeframe}}, no chasing required.
```

**When to use:** Use when you have standard procurement artifacts ready; turn friction into a checklist you can complete.

---

## 6) Timing & Not Right Now

"Not right now" is often a soft no. These templates distinguish a real future date from a polite exit, without being pushy.

### T051 — The date-setting close

**Formula block:** 3S

```
Hi {{FirstName}} — totally fine that it's not the priority this week.

When does it become one? Month, quarter, or after {{EventName}}?

I'll send you something useful now and check back then. No ongoing nudge in between.
```

**When to use:** Use when the buyer says "later" — get a concrete date instead of another email in a week.

### T052 — The trigger-based delay

**Formula block:** SPARK

```
Hi {{FirstName}} — no problem at all on the timing.

One thing that might be worth watching: {{TriggerEvent}}. That's usually when {{Problem}} gets
expensive for {{Industry}} teams, because {{Reason}}.

If that lands, I'll send {{Deliverable}}. If something else changes first, just tell me and I'll
adjust.
```

**When to use:** Use when there's an external event that will genuinely create urgency later.

### T053 — The budget-cycle deferral

**Formula block:** EBIN

```
Hi {{FirstName}} — makes sense, budget's already committed this quarter.

Most {{Role}}s at {{Company}}'s stage pick this up in {{Month}}, when {{BudgetCycle}} reopens.

I can send the {{Deliverable}} now so it's already in front of you when that happens — no cost, no
commitment.

Sound good?
```

**When to use:** Use when budget cycles are a known, predictable pattern for that company size or industry.

### T054 — The low-commitment step

**Formula block:** LIST

```
Hi {{FirstName}} — if the full thing isn't right now, how about the smallest version that still
helps?

{{SmallOffer}} — {{Timeframe}}, no integration, no commitment.

If it doesn't move {{Metric}} at all, you'll have lost {{TimeToConsume}} and you'll know the bigger
version won't work either. That's still useful information.

Try it?
```

**When to use:** Use when a genuinely small, self-serve step can produce a signal you both learn from.

### T055 — The priority-check

**Formula block:** 3S

```
Hi {{FirstName}} — one honest check before I stop.

Is {{Problem}} (a) top three for {{Company}} this quarter, (b) on the list but not urgent, or (c)
not actually a priority?

(a) — I'll send the full walkthrough.
(b) — I'll send the one-pager.
(c) — I'll close the file and won't email again.
```

**When to use:** Use to sort a vague "not right now" into a real category; it takes ten seconds to answer.

### T056 — The seasonal pause

**Formula block:** PAS

```
Hi {{FirstName}} — I know {{Season}} is a bad stretch for {{Industry}} conversations about
{{Problem}}.

I'll stop here and pick it back up in {{Month}}, when {{RelevantSeasonEvent}} is done.

One thing worth doing in the meantime: {{Deliverable}}. No obligation. I'll only follow up in
{{Month}}.
```

**When to use:** Use when industry seasonality is real and verifiable; state the re-engagement date and stick to it.

### T057 — The priority-conflict email

**Formula block:** PAS

```
Hi {{FirstName}} — before we keep going, let me make sure I'm not creating work.

Right now you've got {{CompetingPriority}}, {{CompetingPriorityTwo}}, and {{TheirProject}} landing.
Adding {{OurProject}} isn't a priority I can force.

If it's genuinely not, say so — I'll take you off this list and won't re-add you.

If it becomes priority in {{Month}}, reply "later" and I'll follow up then.
```

**When to use:** Use when you can name their actual competing priorities from public information; offer a clean exit.

### T058 — The freeze-and-nurture

**Formula block:** LIST

```
Hi {{FirstName}} — putting this on ice, as you suggested.

I'll stop the emails. What I'll keep doing: sending {{ResourceFrequency}} — {{ResourceDescription}}
— because it's useful regardless of whether you buy anything.

If something changes and {{Problem}} becomes urgent, reply "urgent" and I'll get you in front of it
within {{Timeframe}}.
```

**When to use:** Use when the prospect is genuinely busy but still a good fit later; keep the value stream lightweight.

### T059 — The waitlist-position email

**Formula block:** SPARK

```
Hi {{FirstName}} — you asked to hear when {{ProductName}} did {{Capability}}.

It ships in {{Month}}. Your place in the early-access list is {{Position}}.

In the meantime, {{InterimOffer}} will cover about {{CoveragePercent}} of the problem, and it'll
still be useful after launch.

Want the interim version?
```

**When to use:** Use when there's a genuine waitlist and a real interim workaround, not a stalling tactic.

### T060 — The honest-deferral close

**Formula block:** ANCHOR

```
Hi {{FirstName}} — I don't want to keep nudging you if this isn't happening.

Two honest options:
1. {{Company}} isn't a fit — tell me and I'll stop.
2. It fits, just not now — reply "later" and I'll follow up in {{Month}}.

Option 2 costs you one word and you'll hear from me exactly once more.
```

**When to use:** Use as the cleanest form of close; make option 1 genuinely easy to take.

---

## 7) After a Demo or Call

The demo just happened. This email either converts the meeting into next steps or lets it evaporate.

### T061 — The recap-with-decision-path

**Formula block:** ANCHOR

```
Hi {{FirstName}} — thanks again for the {{Day}} call.

Three things we covered: {{PointOne}}, {{PointTwo}}, and {{ProblemYouNamed}}.

The decision you're weighing is {{DecisionPoint}}, and honestly the fork is {{OptionA}} vs
{{OptionB}} — they suit different stages.

My recommendation: {{Recommendation}}, because {{Reason}}.

Want me to send {{Deliverable}} and set up {{NextStep}}?
```

**When to use:** Use within two hours of the call, while the context is fresh; recap decisions, not pleasantries.

### T062 — The pilot-scoping email

**Formula block:** BAB

```
Hi {{FirstName}} — good session. As promised, here's the scope for a {{PilotDuration}} pilot.

Before: {{CurrentState}} with {{CurrentEffort}}.
After: {{PilotOutcome}}, measured on {{Metric}}.

Scope includes {{DeliverableOne}}, {{DeliverableTwo}}, {{DeliverableThree}} and {{SupportLevel}}.
Start date: {{StartDate}}. Cost: {{PilotPrice}}.

Two questions: does that scope match your {{Stakeholder}}'s expectations, and does {{StartDate}}
still work?
```

**When to use:** Use after a demo where the buyer said "let's try it"; define the scope in writing before starting.

### T063 — The technical-validation follow-up

**Formula block:** EBIN

```
Hi {{FirstName}} — you asked about {{TechnicalQuestion}}. Short answer: {{DirectAnswer}}.

Details: {{TechnicalDetailOne}}. {{TechnicalDetailTwo}}. Integration with {{TheirStack}} takes
{{Timeframe}}.

The one caveat worth knowing: {{KnownLimitation}} — here's how {{SimilarClient}} handled it:
{{Mitigation}}.

Want me to set up a technical session with {{EngineerName}}?
```

**When to use:** Use when engineering or IT was on the call and asked a concrete technical question.

### T064 — The procurement-prep email

**Formula block:** PAS

```
Hi {{FirstName}} — before you take this to {{ProcurementContact}}, let me make that easier.

You asked how {{Company}} handles {{Requirement}}. Here's the honest version:
{{RequirementOne}} — {{HowYouHandleIt}}.
{{RequirementTwo}} — {{HowYouHandleIt}}.
{{RequirementThree}} — {{HowYouHandleIt}}.

Anything above that needs a custom answer, tell me and I'll get you a written response within
{{Timeframe}}.

Also happy to join a 20-minute call with {{ProcurementContact}} — their questions, your answers, no
selling.
```

**When to use:** Use when you know a procurement or security review is coming; pre-answer it and offer to join.

### T065 — The multi-threading email (internal champion)

**Formula block:** MVF

```
Hi {{FirstName}} — one favor while this is moving.

Based on our call, {{StakeholderName}} will care about {{TheirSpecificConcern}} more than anything
else we discussed.

Would you be comfortable forwarding them the {{ShortDoc}}? It covers just that topic — {{DocScope}}
— and takes about {{ReadTime}} to read.

If it's easier, I can send them a note directly and copy you. Either way works.
```

**When to use:** Use when you have a champion and know which internal stakeholder owns the deciding factor.

### T066 — The no-obstacles email

**Formula block:** PAS

```
Hi {{FirstName}} — based on {{CallDate}}, I don't think we've missed anything.

Here's what I heard:
- {{Goal}}
- {{Constraint}}
- {{Deadline}}
- {{SuccessMetric}}

And here's what we'd do: {{ProposedApproach}}.

If I've got any of that wrong, reply and correct me. If it's right, I'll send {{Deliverable}} and
we can start {{NextStep}}.

Otherwise, keep me honest: what's missing?
```

**When to use:** Use when the call was genuinely smooth; getting confirmation in writing prevents scope drift later.

### T067 — The demo-recording follow-up

**Formula block:** LIST

```
Hi {{FirstName}} — here's the demo recording, exactly as we walked through it: {{Link}}

Two moments worth replaying: {{TimestampOne}} (this is the {{FeatureName}} part you asked about)
and {{TimestampTwo}}.

I also annotated what changes for {{Company}}'s setup specifically.

Watch it when you have {{Timeframe}} and reply with questions.
```

**When to use:** Use when the demo was long or complex; timestamps make the recording usable rather than skippable.

### T068 — The ROI summary email

**Formula block:** EBIN

```
Hi {{FirstName}} — you asked what this would actually return for {{Company}}. Here's the math, with
assumptions visible.

Current state: {{CurrentStateMetric}}.
With {{ProductName}}: {{ProjectedMetric}}.
Payback: {{PaybackPeriod}}.

Assumptions I'm making: {{AssumptionOne}}, {{AssumptionTwo}}.
If either is wrong, tell me and I'll redo it.

If you want, I can model it against {{AlternativeOption}} instead so you can compare.
```

**When to use:** Use when the buyer asked about ROI or payback; show assumptions so they can challenge the model.

### T069 — The stalled-after-demo email

**Formula block:** 3S

```
Hi {{FirstName}} — checking in on the {{ProductName}} demo from {{Date}}.

Did something come up that I haven't answered — a question, a concern, or an internal conversation
I should know about?

If it's on your side, no problem at all. If it's mine, tell me and I'll fix it.
```

**When to use:** Use 5–7 days after a demo with no next step; frame it as an unanswered question, not a chase.

### T070 — The decision-deadline email

**Formula block:** PAS

```
Hi {{FirstName}} — you mentioned {{DecisionDate}} as the date you'd decide by.

I've sent {{Deliverable}}, {{ROIOnePager}}, and {{SecurityDoc}}, so you have everything.

Two things that would help: {{ActionOne}}, and a 20-minute call with {{EngineerName}} if there's a
technical question in your head.

If the answer is "not this time," say so and I'll make sure you're not followed up. If it's yes, I
can have {{ContractOrOnboarding}} ready by {{Date}}.
```

**When to use:** Use only when the buyer themselves set a decision date; restate it exactly.

---

## 8) Multi-Threading / Referral to Another Person

Sometimes the right move is to stop pushing and get you to the person who actually owns the budget or the problem.

### T071 — The direct handoff request

**Formula block:** ANCHOR

```
Hi {{FirstName}} — based on our exchange, I don't think I'm the right person for you.

{{Issue}} is a decision for {{BudgetOwnerRole}}, and {{SpecificNeed}} is owned by {{FunctionRole}}.

Would you point me to them? I'll send a one-line introduction so they know why I'm writing, and you won't get further emails from me.
```

**When to use:** Use when the contact clearly isn't the decision-maker; make the handoff easy and stop emailing them after.

### T072 — The cc-request email

**Formula block:** PAS

```
Hi {{FirstName}} — one more question before I send this over to {{NextPersonRole}}.

Who else needs to be comfortable with {{Topic}} before {{Company}} moves forward? Usually it's {{RoleOne}} and {{RoleTwo}}.

Reply with names and I'll write it so it's relevant to both of them — not a generic pitch with an extra cc.
```

**When to use:** Use when you need two people addressed but don't want to blow up the email with recipients.

### T073 — The "who owns this" email

**Formula block:** 3S

```
Hi {{FirstName}} — who owns {{SpecificProblem}} at {{Company}}?

I'm asking because {{ReasonOne}} usually sits with {{LikelyRole}}, while {{ReasonTwo}} sits with {{OtherRole}} — and we've been talking about both.

Point me to whoever owns it and I'll send one useful thing, not a sequence.
```

**When to use:** Use when the problem straddles two functions and the buyer hasn't identified the owner.

### T074 — The intro-through-you email

**Formula block:** MVF

```
Hi {{FirstName}} — one short ask, then nothing further from me.

Could you forward this to {{TargetRole}} at {{Company}}? They own {{SpecificArea}}, and this is
directly about {{TheirProblem}}.

The message:
"{{SenderName}} at {{Company}} — we help {{Industry}} teams {{Outcome}}. I think there's a fit
around {{Topic}}. Here's a 2-minute summary: {{Link}}."

No need to add anything. I'll take it from there.
```

**When to use:** Use when forwarding to a colleague is natural and you supply the copy so it doesn't cost them effort.

### T075 — The champion-enablement email

**Formula block:** PAS

```
Hi {{FirstName}} — you're the one who'll have to make the case for this, so let me make it easy.

Three points that usually land with {{DecisionMakerRole}}:
1. {{PointOne}}
2. {{PointTwo}}
3. {{PointThree}}

Plus {{ProofArtifact}} if anyone wants evidence.

Want me to join a 15-minute call so you can hand off instead of pitching? I'll answer the hard
questions and leave you out of the awkward parts.
```

**When to use:** Use when you have a genuine advocate; make them look good and reduce their internal risk.

### T076 — The technical-to-commercial bridge

**Formula block:** RAP

```
Hi {{FirstName}} — thanks for the {{TechnicalDetail}} on {{CallDate}}.

Engineers here are only half the decision, so let me make the commercial side easy too.

{{CommercialPointOne}}
{{CommercialPointTwo}}
{{CommercialPointThree}}

If that's useful, I'd like to bring {{CommercialOwner}} into one short thread — they can answer
pricing and contracting directly, and you won't have to relay anything.
```

**When to use:** Use when the technical buyer is engaged but isn't the one who can sign.

### T077 — The procurement-direct email

**Formula block:** ANCHOR

```
Hi {{FirstName}} — you mentioned {{ProcurementContact}} handles vendor onboarding.

Rather than guess, can you point me to them, or would you prefer I reach out directly?

If direct, I'll send a short note covering {{RequirementOne}}, {{RequirementTwo}}, and our security posture — no pitch, just the paperwork they need.

And I'll keep you copied so nothing goes sideways.
```

**When to use:** Use when procurement is involved; ask permission to approach rather than going around the contact.

### T078 — The exec-escalation email

**Formula block:** EBIN

```
Hi {{FirstName}} — I've noticed {{Company}} is spending {{Observation}} on {{RelatedArea}} — probably {{TeamSize}} people and {{ToolsCount}} tools.

{{Industry}} teams that consolidate that spend usually land around {{Metric}}.

Not a pitch today. I'd just like to understand: is that a deliberate strategy, or something that grew one approval at a time?

Curious either way.
```

**When to use:** Use when you want executive-level engagement without a pitch; use observation and genuine curiosity.

### T079 — The multi-stakeholder summary email

**Formula block:** PAS

```
Hi {{FirstName}} — ahead of {{NextMeeting}}, here's a one-page summary so everyone has the same context.

The problem: {{ProblemStatement}}.
What we do: {{SolutionStatement}}.
For {{Company}} specifically: {{SpecificApplication}}.
Evidence: {{ProofPoint}}.
Price and timeline: {{PriceAndTimeline}}.
Open questions: {{QuestionOne}}, {{QuestionTwo}}.

Reply with anything I got wrong, or with the questions you'd like covered live on {{Date}}.
```

**When to use:** Use before a multi-party meeting so the call is spent on decisions rather than shared context.

### T080 — The "not the right person" respectful close

**Formula block:** 3S

```
Hi {{FirstName}} — I think I'm the wrong person for you, and I'd rather say so than keep emailing.

Based on what you told me, {{OtherTypeOfSolution}} fits {{Company}} better than what I sell.

If that's right, I'll close the file — no hard feelings, and I won't be in your inbox again.

If it's wrong and I've misread it, tell me and I'll point you to someone better.
```

**When to use:** Use when the prospect is genuinely a bad fit; disqualifying well protects your reputation and your list.

---

## 9) Inbound Lead Follow-Up

Someone raised their hand. Speed matters, and so does not looking desperate. These handle the first hours, the first week, and the long tail.

### T081 — The instant resource delivery

**Formula block:** LIST

```
Hi {{FirstName}} — thanks for downloading {{ResourceName}}.

Here's the part most people skip: {{SectionName}} (page {{PageNumber}}), because that's where
{{Problem}} usually shows up.

We also put together {{RelatedResource}} if you want the short version of {{Topic}}.

No call needed — but if you want one, reply "call" and I'll send two times.
```

**When to use:** Use immediately after a download, so the lead knows the content was worth requesting.

### T082 — The demo-request response

**Formula block:** 3S

```
Hi {{FirstName}} — happy to walk you through {{ProductName}}.

Before we meet, two things so we spend the time on your questions:

1. What's the workflow you're trying to improve?
2. What's the current cost of it — time, errors, or missed revenue?

Send those and I'll come prepared with {{RelevantUseCase}}.

Times that work for a 25-minute slot: {{TimeOne}}, {{TimeTwo}}, {{TimeThree}}.
```

**When to use:** Use when an inbound lead requests a demo; gather context first so the meeting isn't a generic tour.

### T083 — The pricing-question response

**Formula block:** PAS

```
Hi {{FirstName}} — straight answer on price first: {{Price}} for {{PlanName}}.

What it depends on: {{PricingVariableOne}}, {{PricingVariableTwo}}.

Rough rule of thumb: teams like {{ComparableCompany}} are typically around {{PriceRange}}.

If you tell me {{TeamSize}} and your main use case, I'll give you one number instead of a table —
and if it's more than {{Price}}, I'd rather you know now.
```

**When to use:** Use when an inbound lead asks for pricing; give the real number early and qualify on usage.

### T084 — The trial-midpoint check-in

**Formula block:** 3S

```
Hi {{FirstName}} — you're about halfway through your trial.

One question: has it saved you time yet?

If yes — what specifically? That becomes a case study for {{Company}}, if you're up for it.

If no — what's blocking it? I'd rather fix that than let you quietly expire.
```

**When to use:** Use mid-trial; it surfaces friction while you can still fix it and creates a natural case-study ask.

### T085 — The trial-expiry warning

**Formula block:** PAS

```
Hi {{FirstName}} — your trial for {{ProductName}} ends {{Date}}, and I don't want you to lose
{{SetupWork}} on a technicality.

Three options:
1. Extend {{Days}} days — reply "extend" and I'll do it.
2. Talk to someone about fit — reply "talk" and I'll send two times this week.
3. Keep what you've built — reply "keep" and I'll convert you to {{PlanName}} at {{Price}}.

Which one?
```

**When to use:** Use 3–5 days before trial expiry, with concrete options; defaulting without consent is bad practice.

### T086 — The quote-clarification email

**Formula block:** EBIN

```
Hi {{FirstName}} — your quote for {{Scope}} is {{Price}}, based on {{Volume}} and {{Seats}}.

Two things worth checking before you sign:
1. {{OverageDetail}} — worth about {{OverageEstimate}} a month at your volume.
2. {{TermDetail}} — {{TermLength}}, with {{ExitDetail}}.

If your volume grows, {{GrowthOption}} brings it down to {{RevisedPrice}}.

Want me to model a second scenario at {{HigherVolume}}?
```

**When to use:** Use when sending a quote; pre-empt the two objections that cause quote-stage stalls.

### T087 — The stalled-trial rescue

**Formula block:** 3S

```
Hi {{FirstName}} — saw {{Company}} set up {{Integration}} but hasn't gone further.

No judgement — happens to about {{Stat}} of trials.

Is it a setup issue, a missing feature, or just no time this week?

If it's the first, I'll jump on a 15-minute call and fix it live. If it's the second, tell me which
one — it's genuinely useful to us.
```

**When to use:** Use when trial activity has stalled; name the three real reasons and offer a fast fix for the most common one.

### T088 — The no-show recovery

**Formula block:** ANCHOR

```
Hi {{FirstName}} — we had {{ScheduledTime}} scheduled for {{ProductName}} and it didn't happen. No problem at all — things break.

Rather than reschedule blind, what's the most useful thing I can do?

1. Send a 3-minute recorded walkthrough of {{Topic}}.
2. Send the {{Deliverable}} so you can self-serve.
3. Try again at {{NewTime}}.

Reply 1, 2, or 3.
```

**When to use:** Use after a no-show; offer a lower-effort path first, since they may not want a live call at all.

### T089 — The long-tail nurture email

**Formula block:** LIST

```
Hi {{FirstName}} — we spoke in {{Month}} about {{Topic}}.

Since then I haven't written, because you went quiet and that usually means one of three things: it got solved, it got deprioritized, or I sent the wrong thing.

Which was it? A single word is plenty. If it got solved, I'd genuinely like to know how — that's useful to other {{Industry}} teams.
```

**When to use:** Use 60–90 days after a quiet inbound conversation; the three-way question is easy to answer and gives you a reason to re-engage.

### T090 — The request-for-callback email

**Formula block:** PAS

```
Hi {{FirstName}} — you asked me to call you back, and I did on {{Date}}.

You weren't picking up, so I'll try once more: {{PreferredTime}}.

If something came up, no problem. If you'd rather not do a call at all, say so and I'll send {{Alternative}} instead.
```

**When to use:** Use when the lead explicitly requested a call; make one genuine attempt and offer a written alternative.

---

## 10) Post-Sale or Renewal

The customer already bought. These emails protect revenue, surface expansion, and start renewals on time rather than in a panic.

### T091 — The 30-day value check

**Formula block:** EBIN

```
Hi {{CustomerFirstName}} — you're about a month into {{ProductName}}.

Two quick questions:
1. Has {{TeamName}} hit {{TargetOutcome}} yet?
2. What's the one thing still annoying you about it?

If (2) has an answer, I can usually fix it within a week. Reply honestly — it's the fastest way to
make this worth renewing.
```

**When to use:** Use 30 days after go-live, before the customer has formed a habit of ignoring you.

### T092 — The renewal 90-days-out opener

**Formula block:** ANCHOR

```
Hi {{CustomerFirstName}} — {{Company}}'s renewal is {{Date}}, which is about {{Timeframe}} away.

Two things I'd like to do first:
1. Review what worked and what didn't over the last {{ReviewPeriod}}.
2. Flag anything {{Company}} is using that you'd want to drop before renewal.

Reply "review" and I'll send the prep sheet. It takes about {{Timeframe}} and it makes the renewal
conversation short.
```

**When to use:** Use at least 90 days before renewal; the goal is a short renewal conversation, not a long one.

### T093 — The usage-dropoff check-in

**Formula block:** PAS

```
Hi {{CustomerFirstName}} — I noticed {{Company}}'s usage of {{FeatureName}} dropped from
{{PriorUsage}} to {{CurrentUsage}} over the last {{Timeframe}}.

That usually means one of three things:
1. The workflow moved and we haven't been told.
2. Something broke and nobody said anything.
3. It solved the problem and you moved on.

Which is it? If it's 2, I want to fix it today.
```

**When to use:** Use when usage data shows a real decline; the three options make it easy to reveal a churn signal.

### T094 — The expansion conversation

**Formula block:** BAB

```
Hi {{CustomerFirstName}} — {{Company}} is now doing {{NewUseCase}} that {{CustomerName}} wasn't
doing a year ago.

Two options:
1. Keep everything as-is and use {{AdjacentProduct}} manually on the side.
2. Add {{AdjacentProduct}} to your plan for {{AdditionalPrice}}.

Option 1 usually costs about {{HiddenCost}} a month in staff time. Want me to show you the side-by-
side?
```

**When to use:** Use when the customer's usage has expanded into a natural adjacent need; price the option honestly.

### T095 — The renewal-risk save

**Formula block:** PAS

```
Hi {{CustomerFirstName}} — before {{RenewalDate}}, I want to check one thing honestly.

Is there anything about {{ProductName}} that you've stopped using, or that you'd drop if you could?
Renewal should be because it's still valuable, not because a date came up.

Tell me what's not working — I'll either fix it or tell you to leave. Either answer saves you
money.
```

**When to use:** Use when you suspect a quiet dissatisfaction; it's much cheaper to hear the truth now.

### T096 — The multi-year upgrade pitch

**Formula block:** RAP

```
Hi {{CustomerFirstName}} — {{Company}} is on {{CurrentPlan}}, and you're getting close to
{{LimitThreshold}} on {{LimitFeature}}.

The {{UpgradedPlan}} includes {{UpgradedFeature}}, which removes that ceiling and adds
{{OtherFeature}}.

For {{ClientName}}, moving up at that point was {{DeltaCost}} a month and saved {{HoursSaved}}
hours a week in {{TeamName}}.

Worth comparing before renewal, or does {{CurrentPlan}} still fit?
```

**When to use:** Use when a plan limit is approaching; frame the upgrade as removing friction, not as spending more.

### T097 — The advocacy request

**Formula block:** LIST

```
Hi {{CustomerFirstName}} — {{CustomerName}} achieved {{Metric}}, and you were the one who made that
happen.

Would you be open to:
1. A 30-minute reference call with a peer company, or
2. A short written quote with your name and title?

No pressure, and nothing gets published without your sign-off. Either way, thank you — the
{{Metric}} result was the reason we built {{FeatureName}} in the first place.
```

**When to use:** Use after a clear win with a named champion; make each option small and low-risk.

### T098 — The testimonial-to-case-study upgrade

**Formula block:** PAS

```
Hi {{CustomerFirstName}} — thank you for the kind words about {{ProductName}}.

Would you be open to turning it into a short case study? About {{Timeframe}} of your time, and we'd
cover {{Details}} — the numbers, the before/after, and what made it work.

You'd review and approve every line before anything goes out. Worth a yes or no?
```

**When to use:** Use right after a warm compliment; ask for the smallest version of the ask so the answer is easy.

### T099 — The onboarding-derailment rescue

**Formula block:** 3S

```
Hi {{CustomerFirstName}} — {{CustomerName}} signed up {{DaysAgo}} days ago and hasn't finished
{{OnboardingStep}}.

That's usually one of two things:
1. The setup takes longer than expected.
2. The value only lands once someone else is involved.

If it's 1, I can finish it for you in a 20-minute call. If it's 2, who else should I loop in?
```

**When to use:** Use when onboarding stalls early; the two-cause diagnosis avoids a long generic check-in list.

### T100 — The post-renewal reset

**Formula block:** BAB

```
Hi {{CustomerFirstName}} — you're renewed through {{RenewalDate}}. Rather than leave it there,
let's make the next year better.

Before: {{CurrentUsagePattern}}.
After: {{TargetUsagePattern}} — we did this for {{SimilarCustomer}} using {{Mechanism}} and it took
{{Timeframe}}.

I'll set up {{SessionType}} in {{Month}}. Worth it?
```

**When to use:** Use immediately after a renewal so the account doesn't drift into passive mode.

---

## 11) Event & Webinar Outreach

Events create a natural reason to talk. These templates work before, during, and after the event — and they don't waste the mention.

### T101 — The pre-event invite with a specific ask

**Formula block:** LIST

```
Hi {{FirstName}} — {{EventName}} is on {{Date}}, and I've put together a short guide for
{{EventTopic}}: {{GuideTitle}}.

It covers {{ThreeThings}}, which is the part most {{Role}}s find useful.

Worth sending? It's {{Timeframe}} and there's no sign-up wall.
```

**When to use:** Use 1–2 weeks before an event where the agenda publicly matches a topic you can write about.

### T102 — The speaking-declaration email

**Formula block:** MVF

```
Hi {{FirstName}} — I saw your talk at {{EventName}}, specifically {{SessionTopic}}.

The point you made about {{SpecificPoint}} matches what we see constantly with {{Industry}} teams,
and it's usually the reason {{Problem}} persists — {{YourTake}}.

Worth continuing the conversation? I don't have a pitch for you, just an interesting question about
{{Topic}}.
```

**When to use:** Use after a talk where you can quote a specific idea; make sure your follow-up adds something rather than flattering.

### T103 — The attendee-intro email

**Formula block:** ANCHOR

```
Hi {{FirstName}} — we were both at {{EventName}} for {{SessionTopic}}. I was the one who asked
about {{Question}}.

Your answer about {{SpecificPoint}} was the part I kept thinking about, because it lines up with
what {{SimilarCompany}} ran into.

Did that land the same way for {{Company}}? Curious what you're seeing.
```

**When to use:** Use when you genuinely shared a session with the recipient; reference the shared moment precisely.

### T104 — The event-resource follow-up

**Formula block:** LIST

```
Hi {{FirstName}} — following up on {{EventName}}.

I've put together the promised {{ResourceType}} for everyone who asked: {{Link}}.

It includes {{SpecificContent}}, which covers the question that came up most in the {{SessionName}}
session.

Let me know if you want the version for {{TheirSegment}} instead — I can tailor it.
```

**When to use:** Use within 48 hours of the event, while the attendee still remembers why they wanted it.

### T105 — The post-event nurture

**Formula block:** SPARK

```
Hi {{FirstName}} — saw you attended {{EventName}}.

One thing that surprised me this year: {{EventInsight}} — the conversations were mostly about
{{Topic}}, not {{ExpectedTopic}}.

That usually means the practical implementation is the bottleneck, not awareness.

We wrote up what the teams in the room are doing about it: {{Resource}}. Worth a look?
```

**When to use:** Use 1–2 weeks after an event, using a real observation about what people actually discussed.

### T106 — The host-partnership email

**Formula block:** RAP

```
Hi {{FirstName}} — {{EventName}} clearly has {{AudienceAttribute}} in the room.

The part we're good at is {{OurStrength}}, and the part your attendees usually ask about but don't
have a solution for is {{TheirGap}}.

We could do a 20-minute session on {{SessionTopic}} at your next event — no pitch, just the
practical version, and we'd give attendees a takeaway they can use on Monday.

Would that be useful to {{Company}}?
```

**When to use:** Use with event organizers who clearly understand their audience; propose a session rather than a booth.

### T107 — The attendee-activation email

**Formula block:** 3S

```
Hi {{FirstName}} — you registered for {{EventName}} but I haven't seen you on the attendee list for
{{Date}}.

No judgement — {{EventName}} is a lot of content and people have full calendars.

If you can't make it, I've got {{AlternativeResource}} which covers {{Topic}} from the same angle.

Want that instead, or should I hold the spot?
```

**When to use:** Use a few days before an event when registration data suggests a no-show; offer a substitute.

### T108 — The speaker-intro email

**Formula block:** PAS

```
Hi {{FirstName}} — you're speaking at {{EventName}} on {{SessionTopic}}.

One data point that might be useful for your prep: in our data on {{Number}} {{Industry}} teams,
{{Stat}} — which is usually the number people argue with in sessions like yours.

Happy to share the underlying breakdown. No pitch, just the numbers.
```

**When to use:** Use to offer data to a speaker; useful and low-pressure, and it often produces a warm reply.

### T109 — The event-based one-liner

**Formula block:** 3S

```
Hi {{FirstName}} — heading to {{EventName}} next week.

Will you be there?

If yes, I'll find you. If not, I'll send the {{Resource}} after — either way, no pitch.
```

**When to use:** Use for highly relevant prospects you may meet; keep it extremely short and non-pushy.

### T110 — The post-event debrief email

**Formula block:** EBIN

```
Hi {{FirstName}} — after {{EventName}}, I pulled together what actually happened in the
{{SessionName}} session.

{{Company}} wasn't in the room, so the short version: {{ThreeKeyPoints}}, plus the one stat people
repeated all week.

I've included {{RelevantImplication}} for teams at {{Company}}'s stage. Want the full write-up?
```

**When to use:** Use after an event the prospect didn't attend; give real value first and make the request the last line.

---

## 12) Break-Up Email

The break-up email is the highest-performing email most people never send. These are short, dignified, and genuinely final — with one exception: a real re-opening condition.

### T111 — The clean break-up

**Formula block:** 3S

```
Hi {{FirstName}} — I haven't heard back, so I'll assume this isn't a priority for {{Company}}.

I'll stop here. If it becomes one later, reply to this email and it'll come to me — no follow-ups,
no sequence.

Either way, thanks for your time.
```

**When to use:** Use as the final email after 4–6 touches with no response; truly close the loop.

### T112 — The break-up with a parting gift

**Formula block:** LIST

```
Hi {{FirstName}} — no reply, so this is my last email on {{Topic}}.

Before I go: here's {{ResourceName}}, which covers {{SpecificProblem}} on its own. It's useful whether you buy from us or not.

Take it, and if {{Problem}} ever becomes urgent, reply and it'll come straight to me.

Thanks, {{SenderFirstName}}.
```

**When to use:** Use when you have a genuinely valuable standalone resource; deliver value with no expectation attached.

### T113 — The break-up with a trigger

**Formula block:** SPARK

```
Hi {{FirstName}} — I'll stop emailing now.

One exception, and it's a real one: if {{TriggerEvent}} happens, that's usually when {{Problem}} gets expensive, and I'll send you {{Resource}} then.

Otherwise, you won't hear from me again. Thanks for reading.
```

**When to use:** Use when there is a genuine future trigger; state it so the exception feels like a rule, not a promise.

### T114 — The break-up with a specific door

**Formula block:** ANCHOR

```
Hi {{FirstName}} — closing the loop on {{Topic}}.

If the reason this stalled is {{ReasonOne}}, or {{ReasonTwo}}, or {{ReasonThree}} — tell me which, and I'll do the sensible thing:

1. Wrong timing → I'll follow up in {{Month}}.
2. Not a fit → I'll stop for good.
3. Wrong person → I'll ask you for one name and then leave you alone.

If I don't hear back, that's answer enough. Thanks, {{FirstName}}.
```

**When to use:** Use when you suspect a fixable cause; make each reply path require minimal effort.

### T115 — The respectful-goodbye

**Formula block:** PAS

```
Hi {{FirstName}} — I know outreach is noise, and I don't want to be one more email in your inbox.

I'm going to close this out. If you're ever dealing with {{Problem}} and want a second opinion, my reply address works even after I stop emailing.

Thanks for your time, and good luck with {{Company}}.
```

**When to use:** Use for a warm but non-responsive contact; leave a low-pressure door open without expectations.

### T116 — The break-up that asks for a diagnosis

**Formula block:** EBIN

```
Hi {{FirstName}} — before I drop this, one question that would genuinely help.

Out of {{Number}} similar emails last quarter, the most common reply was "{{CommonReply}}." Is that
you, or is something else going on?

Either way, thank you — it's useful information and I won't follow up either way.
```

**When to use:** Use when you have real reply data; the diagnostic question can be answered with one line and teaches you something.

### T117 — The break-up with a calendar offer

**Formula block:** LIST

```
Hi {{FirstName}} — closing out this thread.

If it'd help to have a second opinion on {{Problem}} without any commitment, I've got {{Timeframe}}
open on {{Date}}.

Or don't reply and I'll assume we're done. Either way, thanks for the time.
```

**When to use:** Use when a short, low-stakes conversation genuinely might solve something; make silence explicitly acceptable.

### T118 — The break-up to a specific role change

**Formula block:** MVF

```
Hi {{FirstName}} — since you moved into {{NewRole}} at {{Company}}, my note about {{OldTopic}}
probably landed at the wrong desk.

I'm closing this one out. If {{Problem}} ends up on your plate, {{Solution}} is what we do — reply
and I'll send the details.

Otherwise, good luck with the new role.
```

**When to use:** Use when you know the contact changed roles; acknowledge it and let the old thread close cleanly.

### T119 — The break-up after a good conversation

**Formula block:** ANCHOR

```
Hi {{FirstName}} — thanks for the time on {{CallDate}}. The part about {{SpecificDetail}} you
shared was genuinely useful to me.

I'm going to stop chasing this. If {{Problem}} becomes a priority, reply and you'll get a straight
answer and a useful artifact — no pitch.

Thanks again, {{FirstName}}.
```

**When to use:** Use after a warm but non-converting conversation; the relationship is worth more than the deal.

### T120 — The break-up with a future door

**Formula block:** 3S

```
Hi {{FirstName}} — last email, promise.

If {{Company}} hits {{TriggerEvent}} — {{SpecificEvent}} — I'll check in once. If it's not relevant then, that's the end of it.

No response needed now. Just wanted you to know there's no hard feelings and one door open.

Thanks, {{SenderFirstName}}.
```

**When to use:** Use as the final touch in a sequence; keep it short, warm, and genuinely one-email-only.

---

## Subject line bank

240 subject lines, grouped by scenario — twenty per scenario, with the psychology angle named for every line so you can pick deliberately instead of guessing.

How to use: match the subject to the template's tone. A contrarian subject with a polite body reads as fake. A curiosity-gap subject needs a body that actually delivers on the gap.

### Scenario 1: Cold First Touch

| # | Subject | Angle/Psychology | Best for scenario |
|---|---|---|---|
| S001 | Quick question about {{Company}}'s {{ProcessArea}} | Question | 1. Cold First Touch |
| S002 | The 3 mistakes costing {{Company}} {{HoursPerWeek}} hours a week | Specific pain | 1. Cold First Touch |
| S003 | How {{SimilarCompany}} cut {{Metric}} without adding headcount | Social proof | 1. Cold First Touch |
| S004 | We benchmarked 30 {{Industry}} companies. {{Company}} stood out. | Number-led | 1. Cold First Touch |
| S005 | A 2-minute fix for {{SpecificProblem}} | Time-saving | 1. Cold First Touch |
| S006 | Nobody wants another tool. They want {{Outcome}}. | Contrarian | 1. Cold First Touch |
| S007 | Can I send you the {{ResourceName}}? | Direct offer | 1. Cold First Touch |
| S008 | Most {{Role}}s in {{Industry}} don't check {{Metric}} monthly | Specific pain | 1. Cold First Touch |
| S009 | 30 {{Industry}} companies, one pattern: {{Pattern}} | Number-led | 1. Cold First Touch |
| S010 | {{FirstName}} — is {{SpecificProblem}} on your list this quarter? | Question | 1. Cold First Touch |
| S011 | The one thing I'd change about {{Company}}'s {{ProcessArea}} | Contrarian | 1. Cold First Touch |
| S012 | What 40 SaaS companies get wrong about {{Topic}} | Authority | 1. Cold First Touch |
| S013 | Try this on {{Company}}'s next {{ProcessArea}} — 5 minutes | Direct offer | 1. Cold First Touch |
| S014 | Saves {{HoursPerWeek}} hours a month. No new hires. | Benefit-first | 1. Cold First Touch |
| S015 | Free benchmark for {{Industry}} — want it? | Direct offer | 1. Cold First Touch |
| S016 | {{Company}} vs the {{Industry}} median on {{Metric}} | Number-led | 1. Cold First Touch |

| # | Subject | Angle/Psychology | Best for scenario |
|---|---|---|---|
| S017 | Your competitors are doing this. You're not. Here's why. | Contrarian | 1. Cold First Touch |
| S018 | Reply "send it" and I'll send the {{Deliverable}} | Reply-required | 1. Cold First Touch |
| S019 | One question, then I'll leave you alone | Reply-required | 1. Cold First Touch |
| S020 | Booking closes {{Date}} — worth a look before then? | Urgency | 1. Cold First Touch |

## Scenario 2: Follow-Up Without Reply

| # | Subject | Angle/Psychology | Best for scenario |
|---|---|---|---|
| S021 | Circling back with something new (not "just following up") | Curiosity gap | 2. Follow-Up Without Reply |
| S022 | New data for {{Company}}: {{RelevantStat}} | Social proof | 2. Follow-Up Without Reply |
| S023 | Follow-up #2 — with one number attached | Number-led | 2. Follow-Up Without Reply |
| S024 | Worth 30 seconds? Reply with one word | Reply-required | 2. Follow-Up Without Reply |
| S025 | I put together what {{SimilarCompany}} did. Here it is. | Social proof | 2. Follow-Up Without Reply |
| S026 | Last follow-up on {{Topic}} — should I close this out? | Question | 2. Follow-Up Without Reply |
| S027 | The thing you asked about, answered | Benefit-first | 2. Follow-Up Without Reply |
| S028 | Your {{Company}} is now in the {{Number}}% of teams that... | Number-led | 2. Follow-Up Without Reply |
| S029 | Quick one: still on the list for {{Problem}}? | Question | 2. Follow-Up Without Reply |
| S030 | This replaces {{ManualTask}} — takes one afternoon | Time-saving | 2. Follow-Up Without Reply |
| S031 | 60 companies. One pattern: {{Pattern}} | Social proof | 2. Follow-Up Without Reply |
| S032 | A 1-page answer to {{SpecificQuestion}} | Time-saving | 2. Follow-Up Without Reply |
| S033 | Still worth your time, or should I stop? | Reply-required | 2. Follow-Up Without Reply |
| S034 | Before {{EventDate}} — here's what usually matters | Urgency | 2. Follow-Up Without Reply |
| S035 | The 2-minute version for {{Company}} | Time-saving | 2. Follow-Up Without Reply |
| S036 | No pitch, one useful thing: {{ResourceName}} | Direct offer | 2. Follow-Up Without Reply |
| S037 | Tried this with {{SimilarCompany}} — {{Metric}} | Social proof | 2. Follow-Up Without Reply |
| S038 | Reply "not now" and I'll stop following up | Reply-required | 2. Follow-Up Without Reply |
| S039 | Here's what changed since my last email | Curiosity gap | 2. Follow-Up Without Reply |
| S040 | Send me one word and I'll do the right thing | Reply-required | 2. Follow-Up Without Reply |

## Scenario 3: Re-Engagement / Dormant Lead

| # | Subject | Angle/ Psychology | Best for scenario |
|---|---|---|---|
| S041 | It's been {{TimeSince}} — here's why I'm reaching out now | Curiosity gap | 3. Re-Engagement / Dormant Lead |

| # | Subject | Angle/ Psychology | Best for scenario |
|---|---|---|---|
| S042 | Since we spoke, {{Company}} crossed {{Milestone}} | Specific pain | 3. Re-Engagement / Dormant Lead |
| S043 | Your {{ProductName}} question has an answer now | Benefit-first | 3. Re-Engagement / Dormant Lead |
| S044 | Everything changed since {{Month}} — including this | Curiosity gap | 3. Re-Engagement / Dormant Lead |
| S045 | Worth a look? This solves the problem we discussed | Direct offer | 3. Re-Engagement / Dormant Lead |
| S046 | Still losing {{Metric}} to {{Problem}}? | Specific pain | 3. Re-Engagement / Dormant Lead |
| S047 | The feature you asked for in {{Year}} just shipped | Benefit-first | 3. Re-Engagement / Dormant Lead |
| S048 | One honest question about {{Company}}'s {{ProcessArea}} | Question | 3. Re-Engagement / Dormant Lead |
| S049 | New benchmark data for {{Industry}} — {{Number}} companies | Number-led | 3. Re-Engagement / Dormant Lead |
| S050 | We wrote up what the teams that scaled past {{Milestone}} did | Social proof | 3. Re-Engagement / Dormant Lead |
| S051 | Reply "not now" and I'll check back in {{Month}} | Reply-required | 3. Re-Engagement / Dormant Lead |
| S052 | Would {{Company}} still be dealing with {{Problem}}? | Question | 3. Re-Engagement / Dormant Lead |
| S053 | Pricing changed — and for {{Company}} it means {{Impact}} | Specific pain | 3. Re-Engagement / Dormant Lead |
| S054 | Your {{NewRole}} at {{Company}} will hit this | Specific pain | 3. Re-Engagement / Dormant Lead |
| S055 | This took {{SimilarCompany}} from {{PriorState}} to {{NewState}} | Social proof | 3. Re-Engagement / Dormant Lead |
| S056 | Free checklist: is {{Problem}} fixable in a week? | Direct offer | 3. Re-Engagement / Dormant Lead |
| S057 | The one number I'd watch for {{Company}} | Number-led | 3. Re-Engagement / Dormant Lead |
| S058 | Is {{Problem}} still a priority, or has it moved? | Question | 3. Re-Engagement / Dormant Lead |
| S059 | Three questions, one answer — for {{Company}} only | Direct offer | 3. Re-Engagement / Dormant Lead |
| S060 | Closing the loop on {{Topic}} — one last time | Reply-required | 3. Re-Engagement / Dormant Lead |

## Scenario 4: Referral & Partner Intro

| # | Subject | Angle/ Psychology | Best for scenario |
|---|---|---|---|
| S061 | Quick ask: could you introduce me to {{TargetRole}}? | Reply-required | 4. Referral & Partner Intro |
| S062 | Do you know anyone at {{TargetCompany}} who owns {{ProcessArea}}? | Question | 4. Referral & Partner Intro |
| S063 | Forwardable blurb for {{TargetCompany}} — ready to send | Time-saving | 4. Referral & Partner Intro |
| S064 | {{PartnerName}} and we solve the same gap you have | Social proof | 4. Referral & Partner Intro |
| S065 | Referring you to {{PartnerName}} — and here's why | Direct offer | 4. Referral & Partner Intro |
| S066 | A 15-minute intro could save {{Company}} {{Metric}} | Benefit-first | 4. Referral & Partner Intro |
| S067 | {{MutualName}} said this fits. Worth 15 minutes? | Authority | 4. Referral & Partner Intro |
| S068 | Intro request: {{TargetCompany}} + {{Company}} | Question | 4. Referral & Partner Intro |
| S069 | {{SimilarCompany}} said to mention {{Problem}} | Social proof | 4. Referral & Partner Intro |
| S070 | Two minutes of my time, one useful answer for {{Company}} | Time-saving | 4. Referral & Partner Intro |
| S071 | Reply "intro" and I'll send the forwardable note | Reply-required | 4. Referral & Partner Intro |
| S072 | Why {{PartnerName}} is the right fit for {{Company}} | Authority | 4. Referral & Partner Intro |
| S073 | The gap you can't solve alone | Specific pain | 4. Referral & Partner Intro |
| S074 | 20 minutes, both of us, one plan for {{Company}} | Benefit-first | 4. Referral & Partner Intro |
| S075 | If you know a {{Role}}, this takes one forward | Direct offer | 4. Referral & Partner Intro |
| S076 | New hire at {{Company}}? This is for them | Specific pain | 4. Referral & Partner Intro |
| S077 | Here are the 3 things that usually land with {{DecisionMaker}} | Benefit-first | 4. Referral & Partner Intro |
| S078 | Should I reach out to {{TargetRole}} directly? | Question | 4. Referral & Partner Intro |
| S079 | {{ClientName}} introduced this to us — here they are | Social proof | 4. Referral & Partner Intro |

| # | Subject | Angle/ Psychology | Best for scenario |
|---|---|---|---|
| S080 | Referral terms, one page, no obligation | Direct offer | 4. Referral & Partner Intro |

## Scenario 5: Pricing & Budget Objection

| # | Subject | Angle/Psychology | Best for scenario |
|---|---|---|---|
| S081 | Is {{Price}} the problem, or is it the ROI? | Question | 5. Pricing & Budget Objection |
| S082 | What {{Problem}} actually costs {{Company}} per month | Specific pain | 5. Pricing & Budget Objection |
| S083 | Before you say it's too expensive: read this | Contrarian | 5. Pricing & Budget Objection |
| S084 | {{SimilarCompany}} paid {{Price}} and got {{Metric}} | Social proof | 5. Pricing & Budget Objection |
| S085 | A smaller version: {{NarrowScope}} for {{NarrowPrice}} | Direct offer | 5. Pricing & Budget Objection |
| S086 | Your budget cycle for {{Function}} runs {{CycleTiming}} — right? | Question | 5. Pricing & Budget Objection |
| S087 | Here's the math, assumptions included | Authority | 5. Pricing & Budget Objection |
| S088 | Start at {{PilotPrice}}, stop if {{Threshold}} isn't hit | Direct offer | 5. Pricing & Budget Objection |
| S089 | Payback period: {{PaybackPeriod}} | Number-led | 5. Pricing & Budget Objection |
| S090 | What {{Company}} spends today vs. what {{ProductName}} costs | Specific pain | 5. Pricing & Budget Objection |
| S091 | Is it amount, timing, or ownership? Reply 1, 2, or 3 | Reply-required | 5. Pricing & Budget Objection |
| S092 | We'd rather you don't buy if the numbers don't work | Contrarian | 5. Pricing & Budget Objection |
| S093 | Three questions before I send the quote | Question | 5. Pricing & Budget Objection |
| S094 | Send me {{InputsNeeded}} — I'll model it for you | Time-saving | 5. Pricing & Budget Objection |
| S095 | The cheaper path is usually {{AlternativeOption}} | Direct offer | 5. Pricing & Budget Objection |
| S096 | How {{Company}} should think about {{Metric}} in {{Year}} | Authority | 5. Pricing & Budget Objection |
| S097 | Payment options that fit a {{FinanceThreshold}} threshold | Direct offer | 5. Pricing & Budget Objection |
| S098 | Price isn't approved — now what? | Question | 5. Pricing & Budget Objection |
| S099 | This saves {{HoursPerWeek}} hours a week. Here's the math. | Time-saving | 5. Pricing & Budget Objection |
| S100 | Tell me what finance needs and I'll turn it around | Direct offer | 5. Pricing & Budget Objection |

## Scenario 6: Timing & Not Right Now

| # | Subject | Angle/Psychology | Best for scenario |
|---|---|---|---|
| S101 | When does {{Problem}} become a priority at {{Company}}? | Question | 6. Timing & Not Right Now |
| S102 | No rush — when should I check back? | Reply-required | 6. Timing & Not Right Now |
| S103 | Budget's committed this quarter. Next quarter? | Question | 6. Timing & Not Right Now |
| S104 | I'd rather pause than nudge | Contrarian | 6. Timing & Not Right Now |

| # | Subject | Angle/Psychology | Best for scenario |
|---|---|---|---|
| S105 | One thing worth doing in the meantime | Direct offer | 6. Timing & Not Right Now |
| S106 | The smallest version that still helps | Time-saving | 6. Timing & Not Right Now |
| S107 | What if we looked at this in {{Month}}? | Question | 6. Timing & Not Right Now |
| S108 | Reply "later" and I'll follow up once | Reply-required | 6. Timing & Not Right Now |
| S109 | {{TriggerEvent}} is usually when this gets expensive | Curiosity gap | 6. Timing & Not Right Now |
| S110 | Three honest options — pick one | Question | 6. Timing & Not Right Now |
| S111 | I'm closing this out unless you say otherwise | Reply-required | 6. Timing & Not Right Now |
| S112 | Here's something useful while you wait | Direct offer | 6. Timing & Not Right Now |
| S113 | Your waitlist spot: {{Position}} | Number-led | 6. Timing & Not Right Now |
| S114 | Top three for {{Company}} this quarter, or not? | Question | 6. Timing & Not Right Now |
| S115 | A 10-minute read on {{Problem}} — no commitment | Time-saving | 6. Timing & Not Right Now |
| S116 | This usually comes up in {{Month}} for {{Industry}} | Curiosity gap | 6. Timing & Not Right Now |
| S117 | Would {{FeatureName}} solve it without the rest? | Question | 6. Timing & Not Right Now |
| S118 | Two paths: fix it now, or revisit in {{Month}} | Direct offer | 6. Timing & Not Right Now |
| S119 | Is this actually a priority, or just a maybe? | Question | 6. Timing & Not Right Now |
| S120 | I'll stop emailing unless you tell me otherwise | Reply-required | 6. Timing & Not Right Now |

## Scenario 7: After a Demo or Call

| # | Subject | Angle/Psychology | Best for scenario |
|---|---|---|---|

## Personalization checklist

Before you send anything, spend ten minutes on this. Every row is a place to find a fact that makes your email specific — and specificity is the single best predictor of a reply.

| What to research | Where to find it | What it replaces in your template | Why it matters |
|---|---|---|---|
| The prospect's exact job title and tenure | LinkedIn profile headline + experience | `{{FirstName}}` context, role-specific phrasing | Length at a company changes what they care about |

| What to research | Where to find it | What it replaces in your template | Why it matters |
|---|---|---|---|
| A public trigger: funding, hire, launch, office, event | Press, LinkedIn activity, company news | The `[TRIGGER]` slot in SPARK/ ANCHOR templates | An event causes the moment to be now |
| The company's current tooling (from their stack) | Job posts, careers page, tech pages, G2 | `{{Tool}}`, "your current stack" phrasing | Naming the real tool makes you credible |
| The specific problem their reviews name | G2, Capterra, Trustpilot, app-store reviews | `{{Problem}}`, `[PAIN]` slots | Reviews are what customers already felt |
| Who owns the problem (the decision-maker) | LinkedIn title, company org chart, job posts | `{{Role}}`, `{{DecisionMaker}}` | Wrong person = wasted email |
| Whether they have competitors you can reference | Your own deal notes, public comparisons | `{{Competitor}}` | A named competitor is proof you looked |
| The "how much it costs" numbers (their side) | Their headcount, pricing, their reviews | `{{Metric}}`, `{{Hours}}` | Agitation without a number is just pleading |
| A company size/industry match from your own wins | Your CRM, case studies | `{{SimilarCompany}}`, `{{Proof}}` | Similarity is what makes proof transfer |
| The proposal's seniority / decision power | LinkedIn, org chart, their content | `{{Role}}` framing | Match their level of authority |
| Their recent activity (posts, comments, shares) | LinkedIn activity, their company blog | `{{Topic}}`, `{{Insight}}` | A fresh signal beats a static one |
| The budget/planning cycle if public | Job posts, announcements, industry norms | The before at in scenario 6 and 5 | Timing is a better objection than price |
| Whether you have a mutual connection | LinkedIn "mutual connections", your CRM | `{{MutualName}}` | Warmth multiplies reply rate |
| The pain in *their* words (quote them) | Their posts, support pages, their language | `{{SpecificPain}}` | Your words don't persuade them; theirs do |

**Order of operations:** research first, then pick the template second, then write third. If you pick a template first, you'll be tempted to reverse-engineer a reason to use it. The template is the last decision.

---

## FAQ

**The email doesn't get replies. What am I doing wrong?**
Most likely your placeholders weren't filled with something the prospect recognizes as true of them. A `{{Trigger}}` that isn't a real event reads as an excuse to write. Re-check the checklist: if you can't finish it in ten minutes for a given prospect, that prospect shouldn't get a personalized pitch. Secondly, check your subject line. If your subject is a question but your body is a claim, the mismatch kills trust. Match tone.

**Should I send follow-ups to people who never opened?**
No. If they never opened, your first line never got read — so your follow-up is the second chance. The exception is a genuinely new trigger that would make *anyone's* first line more relevant. Sending the same subject three times is worse than sending a new one once.

**How do I keep the cadence from feeling aggressive?**
Space them out and make each one add new value. Standard rhythm: touch 1 on day 0, touch 2 on day 4–6, touch 3 around day 10–14, then the break-up at day 21–28. The break-up emails are what make you look professional — they tell the buyer when to stop hearing from you. Silence is not anxiety if you've said you'll stop.

**What if I'm a freelancer and not a "company"?**
Use your own name instead of `{{Company}}`. The templates work the same. The placeholders that change: `{{SenderFirstName}}` becomes the whole sender identity, and `{{Proof}}` becomes one specific project rather than a customer list. Short, specific, one ask — that's the formula regardless of scale.

**Should I personalize the subject line too, or keep it clean?**
Both. A personalized subject (a name, a company, a real number) raises opens when it's true. But don't put their name in the subject *and* in the first line — that reads as spam. Use a personalized subject OR a personalized opening, not both on the same email.

**The template is 90 words but my offer is complex. What do I do?**
Choose a different scenario. Complex offers that need explanation are a "For a Demo or Call" problem, not a cold-first-touch problem. The first email should be gate, not a brochure. You get a second email only if you earn it — which means you can't cram the whole offer into the first one.

**When should I send?**
Tuesday–Thursday, 8–11 AM in the buyer's timezone is the median. But median isn't your answer: test. If your list is in a different timezone than you, schedule for their morning, not the back. If you see an open rate below ~30% or a reply rate below ~10%, the issue is usually the subject line and the opening line — fix those before the body.

**Can I put all twelve scenarios in sequence for the same prospect?**
You can, but you shouldn't. No buyer needs all twelve. The sequence that works for a warm inbound lead (scenario 9) is not the sequence for a cold one (scenario 1). Pick the scenario that matches reality, and only escalate to a break-up (scenario 12) when you've genuinely exhausted the other angles.

**What does a "reply-required" subject mean for my campaign?**
It means the email is designed to be answered by a single keystroke — "send it," "1," "not now." That reduces the cognitive cost of replying. Use those subjects only when the body asks exactly one thing that has a one-word answer. If your body asks for a meeting time, a reply-required subject is a bait-and-switch.

## Free lifetime updates — every future version is yours

You own this file for life. When the collection grows, when templates get rewritten, or when new scenarios get added, you get every future version at no additional cost — no subscription, no paywall, no "upgrade" gate. The template IDs are designed to be stable, so your notes, your A/B tests, and your shared library keep working when a new version lands. Watch the product page for updates; re-download freely, forever.

Thanks for reading. Go earn some replies.
