Legal Client Intake AI Prompt Pack

Firm-grade prompts for intake, drafting, research and client comms

A practical, ready-to-use collection of 52 prompts and 8 templates designed for solo practitioners, paralegals, and small law firms. This pack helps you run a cleaner intake, capture better matter information, draft faster, and keep clients informed — without ever letting the AI outrank your judgment.

Responsible Use & Verification (Please Read First)

This pack is a productivity aid for licensed legal professionals. It is **not a substitute for legal advice, legal judgment, or the professional responsibilities you owe your client, your jurisdiction, and the court.**

Before you use anything in this document, commit to the following ground rules:

1. **AI drafts; you approve.** Every prompt in this pack is engineered to produce a *draft* that you must review, correct, and approve before it goes anywhere. The AI is a starting point, never the final word.
2. **Verify all citations, statutes, and factual assertions.** Language models can and do hallucinate — inventing case names, mis-citing statutes, and producing confident-sounding but wrong legal propositions. You must independently verify every citation against primary sources (the official reporter, the jurisdiction's codified statutes, court rules) before relying on it.
3. **Check the jurisdiction's current rules.** Law changes. A statute, rule, or form that was correct last year may have been amended, superseded, or invalidated. Confirm that any rule you rely on is current in your specific jurisdiction, court, and venue.
4. **Do not paste client confidential information into consumer AI tools.** The AI tool you use may train on your inputs, store them, or share them with third parties. Before feeding in any client name, facts, or documents, check your firm's data policy, your confidentiality obligations, and the tool's terms — and use a professional-grade, confidential tool (or a sandboxed/de-identified version) where appropriate.
5. **Time-sensitive matters need current verification.** Deadlines, court dates, and filing rules are live, high-stakes facts. Never rely on AI output for a deadline or date; confirm against the docket, the court's calendar, and your own case management system.
6. **Conflicts and privilege are yours to manage.** The AI does not know your firm's conflicts database or your client's posture. Run every proper conflict check through your own system, and treat all communications with clients as potentially privileged material that must remain protected.
7. **Follow your jurisdiction's ethics rules on technology use.** Many jurisdictions require lawyers to remain competent in technology and to supervise any AI assistance. Ensure your use of these tools complies with your applicable rules of professional conduct, including any disclosure obligations to clients about your use of AI.

> **The one-line rule:** Treat everything the AI produces as a *draft to be checked*, not an answer. When in doubt, verify. When you cannot verify, do not use.

How to Use This Pack

1. **Pick a prompt.** Each prompt below lives under a category heading and has a descriptive name. Uses the one that matches the task you are doing.
2. **Fill in the placeholders.** Every prompt uses `{{double-brace placeholders}}`. Replace each placeholder with your real details — client names, jurisdiction, dates, facts.
3. **Paste into your AI tool.** Use the same AI tool you normally use. For anything involving client facts, apply the confidentiality rules above.
4. **Get a draft, then verify.** The prompt tells the AI what to produce. Review the output, check every citation and assertion, fix what is wrong, and make it yours.

5. **Only then use it.** The draft becomes a usable work product once you — the responsible professional — have verified and approved it.
6. **Use the templates.** The eight intake and matter-management templates in the next section are ready to paste into your documents, CRM, or case management system. They give your practice a consistent structure.
7. **Run the verification checklist.** Before relying on anything, walk the checklist in the Verification section at the end of this pack.

Intake & Matter-Management Templates

These eight templates are ready to paste into your documents, CRM, case management system, or Notion. Each is a fill-in form designed to give your practice a consistent structure across every matter. Use them as-is, or adapt them to your firm's workflow.

Template 1: New Client Intake Questionnaire

Use this to collect the baseline information from a prospective client at the very first touchpoint. Adapt the questions to your practice area.

```
NEW CLIENT INTAKE QUESTIONNAIRE

SECTION A — CLIENT IDENTITY
1. Full legal name: {{client full name}}
2. Preferred name / pronunciation: {{preferred name}}
3. Date of birth: {{date of birth}}
4. Government ID / last four: {{ID or last four digits}}
5. Email: {{email}}
6. Phone (primary): {{phone}}
7. Phone (alternate): {{alternate phone}}
8. Current address: {{address}}
9. Preferred contact method: {{DM / email / phone / text}}
10. How did you hear about our firm? {{source}}

SECTION B — MATTER BASICS
11. What is the nature of your legal issue? {{describe in your own words}}
12. Have you spoken with or hired another attorney about this matter? {{yes/no + firm}}
13. Is there any litigation, demand, or deadline already in place? {{describe + dates}}
14. What outcome are you hoping for? {{desired outcome}}
15. Do you have a budget or fee expectation? {{budget}}

SECTION C — PARTIES & OTHERS
16. Who are the other parties involved? {{names + relationship}}
17. Are there any related individuals or entities that may be affected? {{describe}}
18. Has anyone else been given authority to act on your behalf? {{yes/no + names}}

SECTION D — TIMELINE & DOCUMENTS
19. When did this issue first arise? {{date}}
20. What documents do you have related to this matter? {{list + where they are}}
21. Are any documents missing or unavailable? {{describe}}
22. Any prior correspondence, contracts, or agreements involved? {{list}}

SECTION E — BACKGROUND & CONFLICTS
23. Have you ever been a party to a lawsuit before? {{describe}}
24. Is there any prior relationship between you and our firm or any of our attorneys? {{yes/no}}
25. Any potential conflicts of interest we should know about? {{describe}}

SECTION F — AGREEMENT & NEXT STEPS
26. Do you consent to our firm representing you? {{yes/no}}
27. Do you consent to our standard fee arrangement? {{yes/no + signature}}
28. What is the next deadline or step you expect us to handle? {{describe}}

CLIENT SIGNATURE: {{signature}}     DATE: {{date}}
INTAKE SPECIALIST: {{name}}          DATE: {{date}}
```

How to use: Collect this by email, web form, or a live intake call, then enter it into your matter management system. *Verification step:* confirm the identity and contact details with the client, and document the source and date of receipt for your conflict check and file.

Template 2: Conflict-Check Intake Note

Use this before you accept a new matter. It forms the record that your conflicts check was actually run.

```
CONFLICT-CHECK INTAKE NOTE

Matter reference: {{matter number}}
Date of check: {{date}}
Conducted by: {{name}}

PROSPECTIVE CLIENT
- Name: {{name}}
- Entity / affiliated parties: {{names}}
- Adverse parties: {{names}}
- Related matters / matters: {{describe}}
- Any role as witness, fiduciary, or third party: {{describe}}

SEARCH TERMS USED
- Client and adverse party names: {{terms}}
- Alternate spellings, aliases, related entities: {{terms}}

CONFLICTS DATABASE QUERIES
- Query 1 (client name): {{result}}
- Query 2 (adverse party): {{result}}
- Query 3 (related entity): {{result}}
- Query 4 (attorney/prior representation): {{result}}

RESULTS
- No conflict found: □
- Potential conflict identified: □ (describe: {{describe}})
- Wavier required: □ (status: {{status}})
- Decline / screen / firewall: □ (action: {{action}})

CONFLICT CHECK STATUS: {{approved / flagged / declined}}
REVIEWING ATTORNEY: {{name}}    DATE: {{date}}
```

How to use: Run this through your firm's own conflicts database — never rely on the AI to do the conflict check. *Verification step:* confirm the search terms cover every party name and entity you know about, and that the result reflects your firm's current conflict records, not the AI's memory.

Template 3: Matter Intake Summary

Use this to create the single "matter overview" document that everyone on the team can scan to get up to speed fast.

```
MATTER INTAKE SUMMARY

Matter number: {{number}}
Client: {{client}}
Matter type: {{type}}
Lead attorney: {{name}}
Support staff: {{name}}
Date opened: {{date}}
Status: {{open / pending / closed}}

1. POSITION / FACTS (2–4 sentences)
{{Summarize the client's position and the key facts.}}

2. LEGAL ISSUES
- {{Issue 1}}
- {{Issue 2}}

3. OPPOSING PARTY / COUNSEL
- Name: {{name}}
- Counsel (if known): {{name}}
- Stance / known positions: {{describe}}

4. KEY DEADLINES
- {{Date}} — {{deadline/event}}
- {{Date}} — {{deadline/event}}

5. GOALS / DESIRED OUTCOME
{{Describe what the client wants.}}

6. RISKS / CONCERNS
{{List the main risks and open questions.}}

7. NEXT STEPS
- {{Action}} — owner: {{name}}, due: {{date}}
- {{Action}} — owner: {{name}}, due: {{date}}

8. DOCUMENT LOCATION
- File path / folder: {{path}}
- Related documents: {{list}}

PREPARED BY: {{name}}    DATE: {{date}}
```

How to use: Fill this out within 24 hours of intake and keep it current. *Verification step:* confirm every date, party name, and fact against the client's own materials and other your initial interview notes before circulating.

Template 4: Case Chronology Builder

Use this to organize the timeline of events in a matter — essential for pleadings, discovery, and settlement analysis.

```
CASE CHRONOLOGY BUILDER

Matter number: {{number}}
Client: {{client}}
Prepared by: {{name}}    Date: {{date}}

INSTRUCTIONS: Record each event with the best available source. Update continuously as new facts
emerge.

| Date | Event / Action | Party | Source / Document | Importance |
|------|----------------|-------|-------------------|------------|
| {{date}} | {{event}} | {{party}} | {{source}} | {{high/med/low}} |
| {{date}} | {{event}} | {{party}} | {{source}} | {{high/med/low}} |
| {{date}} | {{event}} | {{party}} | {{source}} | {{high/med/low}} |
| {{date}} | {{event}} | {{party}} | {{source}} | {{high/med/low}} |

KEY DATES SUMMARY
- Earliest relevant event: {{date}} — {{event}}
- Latest relevant event: {{date}} — {{event}}
- Critical deadlines: {{dates}}

GAPS / UNKNOWN EVENTS
- {{Describe any missing time periods or unknown facts.}}

OPEN ITEMS
- {{Item}} — owner: {{name}}, due: {{date}}
- {{Item}} — owner: {{name}}, due: {{date}}
```

How to use: Build this early and keep it as the single timeline of truth for the matter. *Verification step:* anchor every row to a source (a document, an email, a verified client statement) and note the source in the document so nothing is an unsourced memory.

Template 5: Client Communication Log

Use this to keep a complete, defensible record of every client touchpoint.

```
CLIENT COMMUNICATION LOG

Client: {{client}}    Matter number: {{number}}

| Date | Time | Method | Contact | Direction (in/out) | Summary | Action / Follow-up |
|------|------|--------|---------|--------------------|---------|--------------------|
| {{date}} | {{time}} | {{email/phone/letter}} | {{name}} | {{in/out}} | {{summary}} | {{action}} |
| {{date}} | {{time}} | {{email/phone/letter}} | {{name}} | {{in/out}} | {{summary}} | {{action}} |

NOTES
- Client's preferred method: {{method}}
- Pending client action: {{item}} — due: {{date}}
- Pending firm action: {{item}} — due: {{date}}

PRIVILEGE MARKING: {{Privileged & Confidential — Attorney-Client Communication}}
```

How to use: Log every substantive contact in real time. *Verification step:* confirm the log captures all material communications accurately and is stored securely as privileged material — and that no client-confidential detail from the log is ever pasted into an unsecured AI tool.

Template 6: Document Request Checklist

Use this to track the documents you need from a client, an opposing party, or a third party.

```
DOCUMENT REQUEST CHECKLIST

Client: {{client}}    Matter number: {{number}}
Request directed to: {{client / opposing party / third party}}
Date request sent: {{date}}

| # | Document requested | Need by | Status | Received date | Notes |
|---|--------------------|---------|--------|---------------|-------|
| 1 | {{document}} | {{date}} | {{requested/overdue/received}} | {{date}} | {{notes}} |
| 2 | {{document}} | {{date}} | {{requested/overdue/received}} | {{date}} | {{notes}} |
| 3 | {{document}} | {{date}} | {{requested/overdue/received}} | {{date}} | {{notes}} |
| 4 | {{document}} | {{date}} | {{requested/overdue/received}} | {{date}} | {{notes}} |

OUTSTANDING ITEMS
- {{Item}} — requested on: {{date}}, follow-up on: {{date}}
- {{Item}} — requested on: {{date}}, follow-up on: {{date}}

STORAGE / LOCATION
- Received documents stored at: {{location}}
- Scanned / indexed: {{yes/no + date}}

FOLLOW-UP LOG
- {{Date}} — reminder sent to {{recipient}} re: {{item}}.
- {{Date}} — reminder sent to {{recipient}} re: {{item}}.
```

How to use: Generate this from your matter file at the start and keep it live. *Verification step:* confirm each pending item has a real owner and a follow-up date, and that you consult the docket/opposing counsel before assuming a request was served or received.

Template 7: Billing / Engagement Tracker Note

Use this to track the engagement terms and the financial health of the matter.

```
BILLING / ENGAGEMENT TRACKER

Client: {{client}}    Matter number: {{number}}

ENGAGEMENT TERMS
- Engagement letter date: {{date}}
- Fee arrangement: {{hourly / flat / contingency / other}}
- Rate(s): {{rate}} (+ {{rate}} for {{role}})
- Retainer amount: {{amount}}
- Advancement / replenishment terms: {{describe}}
- Conflict/indemnity terms: {{describe}}
- Billing cycle: {{monthly / per event / other}}

SAYINGS
- Total billed to date: {{amount}}
- Total collected: {{amount}}
- Total outstanding: {{amount}}
- Trust account balance: {{amount}}
- Next billing date: {{date}}

HOURS / UNITS
| Date | Task | Attorney/Staff | Hours | Rate | Amount |
|------|------|----------------|-------|------|--------|
| {{date}} | {{task}} | {{name}} | {{hours}} | {{rate}} | {{amount}} |

NOTES
- Client billing concerns: {{describe}}
- Write-down / write-off decisions: {{describe}}
- Fee dispute risk assessment: {{low / medium / high}}
```

How to use: Keep this current alongside your actual billing software. *Verification step:* reconcile every figure against your firm's billing system and the engagement letter — never trust the AI to "remember" amounts, and never let an AI-produced summary override your real ledger.

Template 8: Matter Closing Checklist

Use this to close a matter cleanly and fully, minimizing post-closing loose ends.

```
MATTER CLOSING CHECKLIST

Client: {{client}}    Matter number: {{number}}
Closing date: {{date}}    Closed by: {{name}}

1. SUBSTANTIVE WORK
- Final deliverable(s) sent to client: ☐ (list: {{list}})
- All requested work completed: ☐
- Any open issues flagged to client: ☐ (describe: {{describe}})

2. CLIENT COMMUNICATIONS
- Closing letter / final status letter sent: ☐ (date: {{date}})
- Client acknowledged final outcome: ☐
- Client informed of any future deadlines or statutes of limitation: ☐ (describe: {{describe}})

3. BILLING & FINANCES
- Final bill rendered: ☐ (amount: {{amount}})
- All outstanding invoices collected / resolved: ☐
- Trust / retainer balance returned or applied: ☐ (amount: {{amount}})

4. FILES & RECORDS
- File properly organized and indexed: ☐
- Original documents returned to client: ☐ (list: {{list}})
- Retention schedule applied: ☐ (retain until: {{date}})
- Privileged materials secured: ☐

5. CONFLICT / CONFLICT FUTURE
- Matter marked closed in conflicts system: ☐
- Client advised if we may represent opposing interests later: ☐

6. CLOSING SIGN-OFF
- Responsible attorney signature: {{signature}}    Date: {{date}}
- Post-closing review date (if any): {{date}}
```

How to use: Run this at matter close and archive it with the file. *Verification step:* confirm each checkbox against the actual file and billing system, and confirm the retention date reflects your jurisdiction's document-retention rules, not the AI's suggestion.

The Prompts

Each prompt below is a complete, ready-to-paste instruction for your AI tool. Fill the `{{placeholders}}`, paste, and get a draft. Every prompt is followed by a **"How to use"** line that includes the required verification step — **read and apply that step every time.**

Category 1: Client Intake & Intake Notes

Prompt 1.1 — Draft a Client Intake Interview Script

The AI drafts a conversational script you can use live with a new client.

```
You are a legal intake interviewing assistant for a {{practice area}} firm. Draft a structured
intake interview script for an intake call with a prospective client about a {{matter type}}
matter.

The script should:
1. Open with a warm, professional greeting and set the call's purpose.
2. Ask for basic identifying details (name, contact info, how they found the firm).
3. Prompt the client to describe their legal issue in their own words.
4. Ask clarifying follow-up questions to surface key facts: parties involved, timeline, documents
in hand, deadlines, and desired outcome.
5. Ask about prior attorneys, prior/current litigation, and any other professionals involved.
6. Wrap up with next steps, what the client should gather, and a request for permission to proceed
with a conflict check.

Write the script as a labeled dialogue with interviewer lines and brief notes on what to listen
for. Keep each question open-ended where possible.

Use placeholders like {{client name}} where real client details will go. Output only the script,
with no preamble.
```

How to use: Practice the script before a live call and record the client's actual answers into your intake form. *Verification step:* confirm any facts the client gives are logged accurately and verified against documents before you rely on them.

Prompt 1.2 — Create an Intake Summary From Raw Notes

The AI turns your messy call notes into a clean summary.

```
You are a legal intake coordinator. Convert the following raw intake notes into a clean, well-
organized intake summary for a {{matter type}} matter.

Raw notes:
{{paste your notes here}}

The intake summary must include sections for:
- Client identification (name, contact details)
- Matter type and nature of the issue
- Key facts and timeline of events
- Parties involved
- Documents already in the client's possession
- Deadlines or urgent items
- Client's stated goals
- Open questions needing clarification

Preserve every fact stated in the notes; do not invent facts. If any detail is missing or
ambiguous, flag it as [TO CLARIFY] rather than guessing. Use neutral, factual language. Keep the
summary under 400 words.
```

How to use: Paste your notes in, get a clean summary, then review the for accuracy. *Verification step:* compare the summary line-by-line against your original notes and the client's confirmed facts; fix anything missing or misstated before it enters the file.

Prompt 1.3 — Generate Follow-Up Questions for a New Client

Use this when the initial intake left gaps.

```
You are a legal intake assistant. A prospective client has given us the following information about
a {{matter type}} matter:

{{paste client description}}

Generate a list of the 15 most important follow-up questions we should ask to fully understand the
matter. Prioritize questions that:
- Clarify the timeline (when events happened, any deadlines).
- Identify all parties and their roles.
- Surface any written agreements, communications, or documents.
- Uncover potential defenses, risks, or adverse facts.
- Clarify the client's goals and acceptable outcomes.
- Surface any urgency or reason for expedited handling.

For each question, add a one-line note explaining what legal significance the answer would have.
Output as a numbered list.
```

How to use: Send the questions to the client ahead of your next call, or use them live. *Verification step:* verify that the client's answers resolve the gaps and that any new facts are confirmed against documents before you rely on them.

Prompt 1.4 — Summarize a Client's Documents Into an Intake Memo

The AI reads your document list or an uploaded draft and flags what matters.

```
You are a legal intake assistant. Review the following list of documents (or pasted document text)
a client has provided for a {{matter type}} matter:

{{documents or document list}}

Produce a short intake memo that:
1. Lists the documents and, for each, notes what it appears to show.
2. Identifies key facts, dates, and obligations reflected in the documents.
3. Flags missing documents that would likely be important.
4. Notes any apparent inconsistencies or red flags.
5. Lists open questions the documents raise.

Do not invent documents that are not listed and do not assert what a document says unless the text
supports it. Where the contents are unknown, state that they need review. Keep the memo brief and
structured with headings.
```

How to use: Use this to prioritize which documents to review first. *Verification step:* verify the memo against the actual documents — read the original text yourself, do not rely on the AI's reading for facts you will act on.

Prompt 1.5 — Draft a Retainer / Engagement Letter Skeleton

The AI produces a structure you customize with your firm's terms.

```
You are a legal practice management assistant. Draft a skeleton engagement/retainer letter for a
{{practice area}} firm taking on a new client for a {{matter type}} matter.

Include sections for:
1. Scope of representation (services to be provided).
2. Exclusions (what is not included).
3. Fees and billing (rate or arrangement, billing cycle, invoicing).
4. Retainer / advance payments and replenishment.
5. Client responsibilities (providing documents, truthful information).
6. Communication and named contacts.
7. Termination and withdrawal.
8. Conflicts, confidentiality, and privilege.
9. Disclaimer that this is a skeleton and must be finalized by the firm's attorney.

Use {{placeholders}} for client name, matter, dates, and amounts. Do not include legal advice. Keep
the tone professional and clear. Output the full letter skeleton.
```

How to use: Fill in your actual firm terms and have a partner review before sending. *Verification step:* confirm every fee, scope, and termination term matches your firm's approved engagement standards and your jurisdiction's rules on fee agreements.

Prompt 1.6 — Build an Intake Workflow Checklist

The AI turns your firm's stages into a step-by-step checklist.

```
You are a legal operations assistant. Create a step-by-step client intake workflow checklist for a
{{practice area}} firm.

Cover these stages in order:
1. First contact and initial screening.
2. Conflict check.
3. Substantive intake conversation / fact gathering.
4. Document collection.
5. Engagement letter and fee agreement.
6. File opening and matter setup.
7. Client welcome and expectation-setting.
8. First substantive work step.

For each stage, list the specific tasks, who is typically responsible (attorney, paralegal, intake
specialist), and what documentation should be produced. Mark which steps touch confidentiality or
privilege. Keep it practical and usable as a daily checklist.
```

How to use: Print or paste this into your case management system as your standard operating procedure. *Verification step:* confirm the workflow reflects your firm's actual procedures and your jurisdiction's requirements — adapt it, don't just adopt it.

Prompt 1.7 — Draft a Client Welcome Email

The AI drafts the first message that sets expectations.

```
You are a firm's intake assistant. Draft a professional, warm welcome email to a new client for a {{matter type}} matter.

The email should:
1. Thank the client for choosing the firm.
2. Confirm the scope of representation and the named attorney contact.
3. State next steps and what the client should prepare.
4. Set expectations on communication and response times.
5. Reference the engagement letter and any documents to sign or return.
6. Provide contact details for questions.
7. Reassure the client about confidentiality and privilege.

Use {{client name}} and {{placeholders}} for the details. Keep it concise and friendly. Do not include legal advice.
```

How to use: Personalize and send as part of your onboarding. *Verification step:* confirm it accurately reflects the signed engagement terms and that the client has actually signed/returned required documents before a set next steps.

Prompt 1.8 — Create an Intake Data Entry Sheet

Or AI formats intake info for your CRM/case management entry.

```
You are a legal intake data assistant. Organize the following intake information into a clean data-entry sheet compatible with a typical case management system or CRM.

Intake information:
{{paste intake info}}

Output the data as a labeled list of fields, each with its value, using the following field names where applicable:
- Client_First_Name, Client_Last_Name, Client_Email, Client_Phone
- Matter_Type, Practice_Area
- Matter_Status, Date_Opened
- Lead_Attorney, Assigned_Paralegal
- Lead_Source, Intake_Specialist
- Conflict_Status
- Billing_Type, Rate, Retainer_Amount
- Key_Facts (brief), Next_Deadline, Notes

Use U.S. date format (YYYY-MM-DD). Preserve all facts exactly as given; do not add. Flag any field with missing data as [MISSING].
```

How to use: Use the output to pre-fill your CRM, then correct and finalize. *Verification step:* confirm every value matches your intake record and that no part is duplicated or lost when you transfer it.

Category 2: Matter Management & Case Summary

Prompt 2.1 — Draft a Matter Overview Document

The AI creates the one-page overview every team member can use.

```
You are a legal matter management assistant. Draft a one-page matter overview for a {{matter type}} matter for client {{client name}}.

Structure the overview with headings for:
- Matter summary (2–3 sentences)
- Parties involved
- Key legal issues
- Factual background (short)
- Status / current posture
- Key deadlines
- Goals
- Open issues
- Next steps
- Responsible team members

Use {{placeholders}} where details go. Keep it factual, neutral, and under 400 words. If any section has no information yet, leave a placeholder rather than inventing content.
```

How to use: Keep this as the living overview you update weekly. *Verification step:* review it against the actual case file and confirm every date and fact is current and accurate before you share it internally.

Prompt 2.2 — Build a Case Chronology From Raw Facts

The AI organizes scattered facts into a timeline.

```
You are a legal assistant. Organize the following raw facts and events into a clean case chronology for a {{matter type}} matter.

Facts/events:
{{paste facts here}}

Produce a chronological table with columns: Date, Event, Party, Source (if known), and Importance (High/Medium/Low). Then add:
- A one-line summary of the overall story.
- A list of any events with unknown or missing dates, flagged as [DATE UNKNOWN].
- A list of the 5 most important events for the case.

Do not alter or add facts. Where a date is approximate, mark it as [APPROX]. If a fact cannot be placed in time, list it separately.
```

How to use: Use this to prep for a pleading, discovery, or settlement analysis. *Verification step:* confirm each row against a real source (document, email, or verified client statement) and fill any [APPROX]/[DATE UNKNOWN] gaps before relying on the timeline.

Prompt 2.3 — Draft a Status Memo for a Client

The AI turns your working notes into a readable client update.

```
You are a legal assistant. Draft a status memo for client {{client name}} on a {{matter type}}
matter.

Use the following working notes:
{{paste your notes}}

The memo should:
1. Open with a single-sentence summary of the current status.
2. Summarize what has happened since the last update.
3. State the current stage of the matter.
4. Explain any issues or risks in plain language.
5. List the next steps and who will do them.
6. Note any action the client needs to take and by when.
7. Close with a point of contact for questions.

Write in clear, plain, professional language suitable for a client who is not a lawyer. Mark any
deadlines clearly. Do not include legal advice.
```

How to use: Review, tailor, and send after a real check of the docket and file. *Verification step:* verify every date, deadline, and fact against the current docket and file before sending — do not let the AI's summary replace your own check.

Prompt 2.4 — Draft a File / Document Organization Plan

The AI proposes a folder and naming structure.

```
You are a legal operations assistant. Propose a file organization and document-naming plan for a
{{matter type}} matter in a small law firm.

Include:
1. A recommended folder structure (top-level folders and subfolders) for intake, pleadings,
discovery, correspondence, billing, and research.
2. A naming convention for documents (e.g., date + type + author + version).
3. Naming and storage of privileged and confidential documents.
4. A simple version-control approach.
5. Retention and archiving after closing.

Keep it practical and light; solos and small firms need something simple to maintain. Output as a
structured outline.
```

How to use: Apply the structure at matter opening. *Verification step:* confirm your actual storage handles privilege and retention per your jurisdiction's rules — adapt the plan to your tools.

Prompt 2.5 — Draft a Task & Deadline Tracker

The AI converts your matter tasks into a tracked list.

```
You are a legal project assistant. Convert the following matter information into a task and
deadline tracker.

Matter info:
{{paste matter info}}

Produce a table with columns: Task, Owner (attorney/paralegal), Due date, Priority (High/Medium/
Low), Status (Not started/In progress/Done), and Notes. Then list:
- The top 3 urgent tasks.
- Any tasks with no owner, flagged as [NO OWNER].
- Any task dates that conflict with each other or look wrong, flagged as [CHECK DATE].

Generate realistic task steps for the matter type described, but do not invent client facts. Use
{{placeholders}} for specific dates and names.
```

How to use: Load this into your task management system. *Verification step:* flag every deadline against the actual court docket and calendar — an AI-suggested date is never a source of truth for a filing deadline.

Prompt 2.6 — Draft a Conflict Waiver / Screen Request Note

The AI drafts a structure for a conflict situation.

```
You are a legal ethics assistant. Draft a structured note for a firm to evaluate a potential
conflict of interest in a new {{matter type}} matter.

The note should include sections for:
1. Description of the prospective client and matter.
2. Description of the adverse party and how it relates to existing clients.
3. Identification of the potential conflict type (direct adversity, material limitation,
confidential information, etc.).
4. Whether an informed written waiver appears possible under the jurisdiction's rules.
5. Whether screening / ethical wall measures are available and appropriate.
6. Recommendation on next steps (obtain waiver, decline, screen, or seek ethics guidance).

Use {{placeholders}} for the specifics. Present it neutrally as a framework for the responsible
attorney to evaluate — do not issue a conclusion about whether a waiver should be accepted.
```

How to use: Use this as a starting discussion document with the responsible attorney. *Verification step:* confirm the analysis against your jurisdiction's actual conflict and ethics rules and your firm's conflicts database — never rely on the AI's "opinion" that a conflict is or is not waivable.

Prompt 2.7 — Draft a Settlement Analysis Framework

The AI sets up the structure for evaluating a settlement offer.

```
You are a legal assistant. Create a framework for evaluating a settlement offer in a {{matter
type}} matter.

The framework should include:
1. A summary of the offer (amount, terms, conditions).
2. The likelihood of success on the merits (as an assessment range, not a certainty).
3. The likely damages / value range if the case is won.
4. Costs of continuing (fees, time, risk).
5. Risks of trial and litigation.
6. Client's goals and non-monetary interests.
7. A comparison of settlement value vs. expected value of continued litigation.
8. A recommendation framework (not a final recommendation) for discussing options with the client.

Use {{placeholders}} for numbers and facts. Present it as a decision aid for the attorney and
client.
```

How to use: Fill in real numbers and use it to structure a client conversation. *Verification step:* verify all damages, cost, and probability figures against real evidence and your own assessment — the AI cannot know actual probabilities, so treat every number as a placeholder to be corrected.

Prompt 2.8 — Draft a Case Update for the Team

The AI creates a concise internal update to keep everyone aligned.

```
You are a legal team assistant. Draft a concise weekly update for the internal team on a {{matter
type}} matter.

Use these notes:
{{paste notes}}

The update should include:
- What was accomplished this week.
- What is in progress.
- What is blocked or awaiting input.
- Upcoming deadlines.
- Any client communications sent or received.
- Items needing a decision.

Keep it under 250 words, scannable, with short bullet points under each heading. Flag any deadline
that is approaching (within 7 days) with a ⚠ along marker.
```

How to use: Send it in team standups. *Verification step:* confirm the flagged deadlines against the docket and your calendar before the team relies on them.

Category 3: Legal Research & Research Memos

Prompt 3.1 — Draft a Research Memo Outline

The AI structures your research into a memo skeleton.

```
You are a legal research assistant. Draft an outline for a research memo on the following issue for
a {{matter type}} matter:

Issue: {{state the legal question}}

Produce a memo outline with these sections:
1. Question presented (restate it precisely).
2. Brief answer (a summary answer).
3. Statement of facts (placeholder for the facts).
4. Analysis — broken into logical sub-issues, each with a heading.
5. Conclusion.
6. Authorities consulted (statutes, cases, rules — as placeholders, to be verified).
7. Open questions / issues to resolve.

For each analysis section, list the specific legal points to address and the types of authority
that would be relevant. Mark clearly that all citations are placeholders requiring verification.
Output the outline with brief explanatory notes.
```

How to use: Fill the sections as your research progresses. *Verification step:* treat every citation, statute, and rule the AI suggests as unverified until you check it against primary sources in your jurisdiction.

Prompt 3.2 — Brainstorm Research Avenues

Use this when you are unsure where to start on a novel issue.

```
You are a legal research assistant. I am researching the following issue:

{{state the issue}}

Suggest up to 10 distinct research avenues I could pursue. For each avenue:
- State the legal concept or doctrine involved.
- Suggest the type of primary authority to look for (statute, regulation, case law, court rule).
- Suggest secondary sources that might be useful (treatises, restatements, law review articles,
practice guides).
- Note likely search terms to use in a legal database.
- Flag any areas where jurisdictions differ, so I check my own jurisdiction's law.

Keep it practical and specific. Do not assert what the law "is" — instead point me toward where to
find it.
```

How to use: Use the suggested terms to drive your database searches. *Verification step:* this prompt never supplies authority — it points to sources. Verify every source you find against the official reporter and your jurisdiction's current law.

Prompt 3.3 — Draft a Case Summary

The AI condenses a case into a useful capsule.

```
You are a legal research assistant. Summarize a case for a {{matter type}} matter. The case text
follows:

{{paste the case text}}

Produce a case summary with:
1. Case name and citation (as given).
2. Court and decision date.
3. Procedural posture (what court it came from, what was before the court).
4. Facts (short, neutral).
5. Issue(s) presented.
6. Holding.
7. Reasoning (key points, in 3–6 bullets).
8. Rule/standard articulated.
9. Dicta worth noting.
10. Significance for my matter.

Stay strictly faithful to the case text. Where the text is ambiguous or a section is not
applicable, say so rather than guessing.
```

How to use: Use the capsule for your memo and to decide whether to read the full case. *Verification step:* confirm the citation and holding against the actual reported case — read the original holding before you rely on it in your work product.

Prompt 3.4 — Draft a "Split of Authority" Note

The AI organizes competing approaches across jurisdictions.

```
You are a legal research assistant. I need to understand how jurisdictions differ on the following
issue:

{{state the issue}}

Based only on the authorities I provide, organize them into a "split of authority" note. Provide
the following:
- A summary of the majority approach (as reflected in the authorities I give).
- A summary of any minority or alternative approaches.
- A list of jurisdictions applying each approach.
- Key cases supporting each approach (with citations, as provided by me).
- Which approach my jurisdiction {{jurisdiction name}} appears to follow (state which authorities
reflect this, or flag that it is unresolved).

Combine NOT rely on your own memory of the law — only use the authorities I provide. Where I have
not given enough to answer, say so.
```

How to use: This prompt works best with your verified list of cases. *Verification step:* the note is only as good as the authorities you feed it — verify every case and its actual holding before you include it.

Prompt 3.5 — Draft a Research Memo Body

The AI assembles your verified research into a memo.

```
You are a legal research assistant. Draft the analysis section of a research memo for a {{matter type}} matter.

Issue: {{state the issue}}
Controlling/primary authorities I have verified (provide them):
{{paste your verified authorities}}

Write an analysis that:
1. States the applicable rule(s) from the authorities.
2. Applies the rule to the facts of my matter.
3. Addresses any counterarguments.
4. Reaches a reasoned conclusion.
5. Cites the authorities inline (using the citations I provided — do not invent citations).

Use a formal but clear memo style. Where my authorities are insufficient to answer a point, say so explicitly and suggest what additional authority is needed. Do not fabricate cases, statutes, or citations.
```

How to use: Feed this prompt your verified authorities only. *Verification step:* before adding this to your memo, re-check that every citation and proposition traces to a primary source you personally verified.

Prompt 3.6 — Draft a Statute Interpretation Note

The AI helps you parse a statute's text.

```
You are a legal research assistant. Help me analyze the following statute for a {{matter type}} matter:

Statute text:
{{paste the statute text}}

Produce a statutory interpretation note that:
1. States the statute's purpose (as inferred from text and context).
2. Breaks down the operative language clause by clause.
3. Identifies key defined terms (checking the definitions section if provided).
4. Notes whether the statute is written in mandatory ("shall") or discretionary ("may") language.
5. Flags ambiguities and interpretive questions.
6. Suggests related statutes or regulations that might interact with it (as placeholders to verify).

Stay strictly grounded in the text you are given. Do not assert legislative history or intent that is not in the materials you provide.
```

How to use: Pair this with the actual statute and any official commentary. *Verification step:* verify the current, amended version of the statute in your jurisdiction, and confirm any related regulations yourself.

Prompt 3.7 — Draft a Sufficiency Check for a Memo

Use this to pressure-test your own draft memo for gaps.

```
You are a critical legal research reviewer. Review the following draft research memo and identify
weaknesses.

Memo draft:
{{paste your draft memo}}

Assess and report on:
1. Whether the question presented is precise and answered directly.
2. Whether the analysis cites authority for each key proposition, and whether those citations
appear complete.
3. Whether counterarguments are addressed.
4. Whether the conclusion follows from the analysis.
5. Whether the memo distinguishes binding from persuasive authority.
6. Any logical gaps, unsupported assertions, or sections needing more development.
7. Whether the memo flags any uncertainty about the controlling law.

Be blunt and specific. Output as a numbered list of findings. Do not rewrite the memo; just
critique it.
```

How to use: Run your draft through this before sending it out. *Verification step:* this critique is a screen, not a substitute for your own proofreading — verify every citation yourself and fix the gaps the critique surfaces.

Prompt 3.8 — Draft a "Plain Language" Summary of a Legal Rule

The AI restates a rule for a client.

```
You are a legal assistant. Restate the following legal rule in plain, client-friendly language.

Rule/authority:
{{paste the rule or statute}}

Produce:
1. A one-paragraph plain-language explanation of what the rule means.
2. A "what this means for your matter" bullet list applying the rule to these facts: {{paste
facts}}.
3. A short list of caveats or limits of the rule.

Do not give legal advice or a definitive outcome. Keep the tone clear and non-technical. Where the
rule depends on specific facts or jurisdiction, say so.
```

How to use: Send the plain-language version to the client alongside your professional explanation. *Verification step:* confirm the paraphrase does not overstate or understate the actual rule — check it against the primary text before sharing.

Prompt 3.9 — Draft a Research Log / Sources Tracker

The AI formats your research trail for your file.

```
You are a legal research assistant. Organize the following research findings into a clean research log for a {{matter type}} matter.

Findings:
{{paste your research notes}}

Produce a table with columns: Date, Source (case/statute/rule/secondary), Citation, Key proposition, Whether primary or secondary, Status (verified/to verify), and Notes. Then add:
- A short summary of the most helpful authorities found.
- A list of gaps still to fill.

Do not change the substance of the findings. Flag each source as either [VERIFIED] or [TO VERIFY] based on what I have marked.
```

How to use: Keep this log as the provenance trail for your memo. *Verification step:* the value of the log is only as good as its verification flags — make sure every [TO VERIFY] item gets checked against the primary source before you rely on it.

Category 4: Document Drafting

Prompt 4.1 — Draft a Demand Letter

The AI structures a professional demand letter.

```
You are a legal drafting assistant for a {{practice area}} firm. Draft a demand letter on behalf of client {{client name}} against {{opposing party}} regarding {{dispute}}.

The letter should:
1. Use professional letterhead formatting placeholders.
2. Identify the parties and the dispute.
3. Recite the relevant facts (use only facts I supply).
4. State the legal basis for the demand in general terms.
5. State the specific relief/demand being made, with a deadline.
6. Note the consequences of failing to comply (in general terms).
7. Close with a requirement for a written response and reserve of rights.

Use {{placeholders}} for dates, amounts, and specifics. Keep it firm but professional. Do not invent facts or threaten anything improper.
```

How to use: Fill in the verified facts and the firm's signature line. *Verification step:* confirm every fact, amount, and deadline in the letter against the file, and check the tone and demands comply with your jurisdiction's rules on communications.

Prompt 4.2 — Draft a Contract / Agreement Skeleton

The AI lays out a contract structure for your customization.

```
You are a contract drafting assistant. Draft a skeleton for a {{contract type}} agreement for a
{{practice area}} matter.

Include sections for:
1. Parties and recitals.
2. Definitions.
3. Scope / subject matter.
4. Term and termination.
5. Payment / consideration.
6. Representations and warranties.
7. Covenants and obligations.
8. Liability, indemnification, and limitation of liability.
9. Confidentiality.
10. Dispute resolution / governing law.
11. Miscellaneous (notices, assignment, entire agreement, severability, signatures).

Use {{placeholders}} for the specifics. Add a note at the top that this is a drafting skeleton
requiring attorney review and that the governing law and jurisdiction clauses must be set by the
responsible attorney.
```

How to use: Customize for the actual deal and have counsel review. *Verification step:* confirm every clause matches the commercial deal and your jurisdiction's law — especially governing law, indemnity, and severability — before execution.

Prompt 4.3 — Draft a Settlement Agreement Skeleton

The AI structures a settlement agreement.

```
You are a legal drafting assistant. Draft a skeleton settlement agreement for a {{matter type}}
matter between {{party A}} and {{party B}}.

Include sections for:
1. Parties and recitals (including the litigation background).
2. Recitals of the dispute.
3. Settlement amount and payment terms (structured payment schedules if applicable).
4. Mutual releases (mutual / one-way, as appropriate).
5. Non-disparagement.
6. Confidentiality of settlement terms.
7. Return/destruction of materials.
8. Representations and warranties.
9. Governing law and jurisdiction.
10. Enforcement / default.
11. Miscellaneous and signature blocks.

Use {{placeholders}} for amounts and dates. Flag decisions the attorney must make (e.g., whether
the release is mutual, whether confidentiality is requested) with a [DECISION REQUIRED] note rather
than choosing for them.
```

How to use: Fill in the real terms and have counsel confirm before any party signs. *Verification step:* confirm the releases and terms match the negotiated deal and the jurisdiction's rules on settlement agreements and confidentiality.

Prompt 4.4 — Draft a Pleading / Motion Skeleton

The AI structures a basic court filing.

```
You are a litigation drafting assistant. Draft a skeleton for a {{pleading or motion type}} (e.g., complaint, answer, motion to dismiss, motion for summary judgment) to be filed in {{court name}} for a {{matter type}} matter.

Include the standard parts:
1. Caption (with {{placeholders}} for court, parties, and case number).
2. Title of document.
3. Jurisdiction and venue allegations (as placeholders).
4. Parties.
5. Factual allegations (numbered, as placeholders).
6. Claims / causes of action (for a complaint) or arguments (for a motion).
7. Prayer for relief / requested order.
8. Signature block and certificate of service (following the court's rules).

Use {{placeholders}} for everything substantive. Add a note that the document must comply with the specific court's local rules and formatting requirements, which the responsible attorney must confirm.
```

How to use: Use it as the scaffolding for your real filing. *Verification step:* confirm the format, caption, and certificate of service comply with the specific court's local rules, and that every substantive allegation is supported by verified facts.

Prompt 4.5 — Draft a Legal Opinion Memo

The AI structures an internal opinion memo.

```
You are a legal research assistant. Draft a legal opinion memo for a {{matter type}} matter addressing the issue:

Issue: {{state the issue}}

Produce a memo with:
1. TO / FROM / DATE / RE header (with [[placeholders}}).
2. Question presented.
3. Brief answer.
4. Facts (use the facts I supply).
5. Analysis (with headings for each sub-issue).
6. Conclusion.
7. Authorities (placeholders for citations I provide).

Write in a formal in style. Cite only the authorities I provide — do not invent citations. Where the law is unsettled or jurisdiction-dependent, say so plainly and flag what needs to be confirmed for {{jurisdiction name}}.
```

How to use: Feed it your verified research and facts. *Verification step:* verify every citation and the conclusion against primary sources, and confirm the memo distinguishes binding from persuasive authority before you circulate it.

Prompt 4.6 — Draft a Non-Disclosure / Confidentiality Clause

The AI drafts a common clause with placeholders.

```
You are a contract drafting assistant. Draft a confidentiality / non-disclosure clause suitable for
a {{contract type}} agreement between {{party A}} and {{party B}}.

The clause should cover:
1. Definition of confidential information.
2. Exclusions from confidential information (public domain, independently developed, etc.).
3. Obligations of the receiving party.
4. Permitted disclosures (to advisors, as required by law, etc.).
5. Duration of obligations.
6. Return or destruction of materials on termination.
7. Remedies for breach.

Use {{placeholders}} for the specifics (durations, definitions). Keep the language clear and
balanced. Add a note that the clause should be reviewed against the governing law the parties
select.
```

How to use: Insert into the larger agreement and review with counsel. *Verification step:* confirm the duration, definitions, and remedy provisions match the deal and are enforceable in the chosen governing law.

Prompt 4.7 — Draft a Client Engagement Letter Closing Paragraph

The AI drafts a clean closing section.

```
You are a legal practice assistant. Draft a closing paragraph for an engagement letter for a
{{practice area}} firm, including:
1. A statement that by signing, the client agrees to the terms.
2. A confirmation of the client's ongoing obligation to provide truthful, complete information and
documents.
3. A statement about the firm's right to rely on documents the client provides.
4. An acknowledgment of the firm's fee terms and billing cycle.
5. A signature block for the client and the firm.
6. A short paragraph noting that the letter is governed by the law of {{jurisdiction name}} and
that it is the entire agreement.

Use {{placeholders}} for firm name, client name, and date. Keep the language professional and
plain.
```

How to use: Attach to your firm's actual terms. *Verification step:* confirm the paragraph matches your firm's approved engagement language and your jurisdiction's fee-agreement requirements.

Prompt 4.8 — Draft a Witness Statement / Declarant Outline

The AI structures a witness statement.

```
You are a litigation drafting assistant. Draft an outline for a witness statement / declaration for
{{witness name}} in a {{matter type}} matter.

Structure it as:
1. Witness identification (name, role, relationship to the matter).
2. Basis of knowledge (personal knowledge vs. information and belief).
3. Chronological narrative of the facts the witness can testify to (use only facts I provide).
4. Statement of truth (that the contents are true to the best of the witness's knowledge).
5. Signature block and date.

Use {{placeholders}} for facts. Add a note that the final statement must be reviewed by counsel and
comply with the court's rules on declarations/affidavits.
```

How to use: Interview the witness and fill in verified facts, then have the witness review. *Verification step:* confirm the statement only contains facts the witness can personally attest to, and that it complies with the court's rules on the form of declarations.

Prompt 4.9 — Draft a Document-Review Summary

The AI summarizes a batch of documents for your review.

```
You are a document review assistant. Review the following documents (or a list summarizing them)
for a {{matter type}} matter:

Documents:
{{paste documents or summaries}}

Produce a document-review summary that:
1. Lists each document with a one-line description.
2. Notes key facts, dates, and terms in each.
3. Flags documents that appear privileged or confidential.
4. Flags documents that seem important, inconsistent, or damaging.
5. Groups the documents by theme or issue.
6. Lists documents that seem to be missing or that bear further inquiry.

Stay strictly faithful to what is provided. Do not infer facts not in the documents. Flag
uncertainties rather than guessing.
```

How to use: Use this to triage a large production or client document dump. *Verification step:* verify the summary against the actual documents — read the originals for anything you plan to rely on, and confirm privilege designations yourself.

Category 5: Client Communication

Prompt 5.1 — Draft a Client Update Email

The AI writes a clear status email.

```
You are a legal communications assistant. Draft an update email to client {{client name}} about a
{{matter type}} matter.

Working notes:
{{paste your notes}}

The email should:
1. Open with a friendly, professional greeting.
2. Summarize what has happened since the last update in plain language.
3. Explain the current status simply.
4. State the next steps and who will do them.
5. Note anything the client needs to do and by when.
6. Invite questions and provide a contact point.
7. Close warmly.

Keep it concise (under 250 words) and jargon-free. Mark any deadlines clearly.
```

How to use: Review against the docket and file, then send. *Verification step:* confirm every date and step against the actual file before sending — never let AI summary text stand in for a real docket check.

Prompt 5.2 — Draft a Difficult-Message to a Client

The AI helps you communicate bad news with care.

```
You are a legal communications assistant. Draft a sensitive message to client {{client name}} about
the following development in a {{matter type}} matter:

Development: {{describe the development — e.g., an adverse ruling, a settlement demand, a cost
increase}}

The message should:
1. Deliver the news directly and honestly, without burying it.
2. Explain what happened in plain language.
3. Explain what it means for the matter.
4. Present the options and next steps.
5. Offer to discuss by phone.
6. Reassure the client of the firm's commitment.

Keep the tone respectful, clear, and neither falsely reassuring nor alarmist. Use {{placeholders}}
for specifics.
```

How to use: Tailor to the client's situation and confirm facts before sending. *Verification step:* verify the underlying facts (ruling, demand, cost) against the actual source before you send, and confirm the message does not overpromise an outcome.

Prompt 5.3 — Draft a Response to a Client's Angry or Anxious Email

The AI de-escalates.

```
You are a legal communications assistant. Draft a professional, de-escalating reply to a client who
is upset or anxious about a {{matter type}} matter.

The client's email/concern:
{{paste the client's message}}

Your reply should:
1. Acknowledge the client's feelings and their concern respectfully.
2. Clarify the facts or status accurately (use only verified facts).
3. Explain what is being done.
4. Set realistic expectations.
5. Offer a specific next step or a call.
6. Avoid defensiveness and avoid making promises you cannot keep.

Keep it calm, concise, and professional. Do not concede legal errors that have not been verified.
```

How to use: Send after confirming the actual state of the matter. *Verification step:* verify every factual claim in your reply against the file so you do not repeat client's (or your own) misunderstanding.

Prompt 5.4 — Draft a Fee / Billing Explanation to a Client

The AI explains a bill clearly.

```
You are a legal billing assistant. Draft a message to client {{client name}} explaining their most
recent invoice of {{amount}} for a {{matter type}} matter.

Invoice details:
{{paste invoice line items}}

The message should:
1. Summarize the work performed in plain, understandable terms.
2. Explain the major line items on the invoice.
3. Note the total billed and any amounts already paid or outstanding.
4. Remind the client of the payment terms and due date.
5. Offer to walk through any line item by phone.

Keep it neutral, factual, and professional. Where a client might not understand a charge, explain
it simply.
```

How to use: Review against the time entries and engagement letter before sending. *Verification step:* reconcile every figure with your actual billing system and the engagement terms before you present it to the client.

Prompt 5.5 — Draft a Welcome Packet Cover Letter

The AI writes the first professional touch.

```
You are a legal practice assistant. Draft a cover letter to accompany a new-client welcome packet
for {{client name}} on a {{matter type}} matter.

The letter should:
1. Welcome the client and thank them for choosing the firm.
2. List what is in the packet (engagement letter, intake form, privacy notice, etc.).
3. Explain what to sign/return and by when.
4. Introduce the team and their roles.
5. Set expectations for communication and response times.
6. Provide contact info.
7. Close warmly.

Use {{placeholders}} for names and dates. Keep it to one page.
```

How to use: Personalize and send with the packet. *Verification step:* confirm the enclosed documents match what the letter lists, and that any dates referenced are real.

Prompt 5.6 — Draft a Request for Information / Documents From a Client

The AI structures a clear request.

```
You are a legal intake assistant. Draft a message to client {{client name}} requesting specific
information and documents for a {{matter type}} matter.

Needed items:
{{list the items needed}}

The message should:
1. Open politely and explain why the information is needed.
2. List each requested item clearly (with a due date).
3. Explain how to submit the items (portal, email, mail, in person).
4. Note what will happen once received.
5. Offer help if the client has trouble gathering items.

Keep it concise and easy for a non-lawyer to follow. Use {{placeholders}} for the due date.
```

How to use: Send early in the matter to get the file moving. *Verification step:* confirm the requested items are actually needed for the matter and that the deadline you set gives the client reasonable time.

Prompt 5.7 — Draft a Closing / Final Letter to a Client

The AI writes the final communication on a matter.

```
You are a legal practice assistant. Draft a closing letter to client {{client name}} at the
conclusion of a {{matter type}} matter.

Include:
1. A summary of what was accomplished in the matter.
2. The final result/outcome.
3. Any ongoing obligations of the client (e.g., future deadlines, tax consequences, continuing
legal requirements).
4. The status of the file and any documents returned.
5. The final billing status and any refund/remaining balance.
6. A note that the firm's representation has concluded and the client should seek counsel if future
legal needs arise.
7. A courteous closing.

Use {{placeholders}} for the specifics. Keep it clear and complete.
```

How to use: Send after all work and billing are finalized. *Verification step:* confirm the final outcome, billing, and any client obligations are accurate and complete before sending — and that the file is actually closed in your system.

Category 6: Discovery & Evidence

Prompt 6.1 — Draft Interrogatories

The AI proposes a set of questions for your review.

```
You are a litigation drafting assistant. Draft a set of 20 interrogatories to serve on {{opposing
party}} in a {{matter type}} matter.

The interrogatories should:
1. Ask about the opposing party's core factual contentions and the bases for them.
2. Identify witnesses, documents, and evidence they intend to rely on.
3. Elicit the factual details of the dispute (facts I expect to be relevant).
4. Ask about damages or relief sought, and how computed.
5. Include proper definitions and instructions.

Use {{placeholders}} for specifics like matter name, dates, and facts. Add a note that the final
set must comply with the court's rules on the number of interrogatories, definitions, and objection
handling.
```

How to use: Review, tailor to your actual theory of the case, and serve per the rules. *Verification step:* confirm the set complies with your jurisdiction's/court's limits (e.g., number of interrogatories) and that every question is relevant and not objectionable.

Prompt 6.2 — Draft Requests for Production of Documents

The AI proposes categories of documents to request.

```
You are a litigation drafting assistant. Draft requests for production of documents to serve on
{{opposing party}} in a {{matter type}} matter.

Draft requests covering:
1. Contracts, agreements, and related communications.
2. Financial records and computations of damages.
3. Emails and correspondence related to the dispute.
4. Internal reports, notes, and policies.
5. Documents related to the specific events in the case.
6. Insurance or other coverage documents (where relevant).
7. Electronically stored information (ESI) with a reasonable scope.

Use {{placeholders}} for the specific facts and time period. Add definitions and instructions
typical for document requests. Add a note that scope and form must comply with the court's rules on
productions and ESI.
```

How to use: Tailor the request and time frame and serve per the rules. *Verification step:* confirm the requests are relevant, proportional, and comply with the court's discovery rules — including your jurisdiction's approach to ESI and privilege logs.

Prompt 6.3 — Draft a Privilege Log Layout

The AI sets up a privilege log table.

```
You are a litigation assistant. Create a privilege log layout for a {{matter type}} matter to log
withheld documents in response to discovery.

Produce a table with columns for:
- Document number
- Date
- Author / sender
- Recipient(s)
- Type of document
- Description of subject matter
- Privilege claimed (attorney-client, work product, or other)
- Basis / explanation
- Whether a privilege log entry is needed under the court's rules

Add a brief set of instructions for how to fill it in and a note that privilege determinations must
be made by the responsible attorney, not by the AI.
```

How to use: Use this to keep discovery compliance clean and defensible. *Verification step:* have counsel confirm each privilege assertion is proper under your jurisdiction's privilege law before you log it.

Prompt 6.4 — Draft a Deposition Outline

The AI structures a deposition questioning plan.

```
You are a litigation assistant. Draft a deposition outline for deposing {{deponent name}} in a
{{matter type}} matter.

Organize the outline by topic:
1. Background and qualifications of the deponent.
2. Their role and involvement in the matter.
3. Timeline of key events.
4. Communications with the parties.
5. Documents they authored, received, or reviewed.
6. Key factual disputes.
7. Any claims or defenses relevant to their testimony.
8. Financial or damages topics (where relevant).

Under each topic, list 3–6 suggested questions. Add a note that the questions are a starting
framework and must be adapted to the actual facts and the case strategy, and that the deponent's
answers must be checked against documents.
```

How to use: Turn the outline into your actual deposition script with your case strategy. *Verification step:* verify each question is grounded in real, verified documents and facts, and adapt questions to the witness's actual role.

Prompt 6.5 — Draft an Evidence / Exhibit Log

The AI organizes your exhibits.

```
You are a litigation assistant. Create an evidence/exhibit log layout for a {{matter type}} matter.

Produce a table with columns for:
- Exhibit number
- Date
- Description
- Source / custodian
- Authenticated by (witness or stipulation)
- Admissibility notes / objections
- Admitted (yes/no) and by whom

Add brief instructions for maintaining it and a note that authentication and admissibility
determinations are for the attorney and court to decide.
```

How to use: Maintain this through trial. *Verification step:* confirm each exhibit's source and authentication status before you rely on it, and keep your admissibility rulings current.

Prompt 6.6 — Draft a Merits / Facts Memo

The AI organizes the evidence into a factual narrative.

```
You are a litigation assistant. Draft a factual merits memo for a {{matter type}} matter
summarizing the evidence and its support.

Using the following evidence notes (facts, documents, witness statements):
{{paste your evidence notes}}

Produce a memo with:
1. A summary of the key facts.
2. A section organized by issue or element, mapping each fact to the element it supports.
3. A separate section noting favorable facts and unfavorable facts.
4. A section noting gaps in the evidence and what is still needed.
5. A short assessment of the strength of the case (as a range, not a certainty).

Stay faithful to the evidence provided. Flag any fact that is unverified or disputed.
```

How to use: Use this to drive settlement analysis and trial prep. *Verification step:* confirm every fact is backed by a verified source, and treat the strength assessment as a starting framework for your own judgment.

Category 7: Practice Operations

Prompt 7.1 — Draft a Standard Operating Procedure (SOP)

The AI drafts a process document.

```
You are a legal operations assistant. Draft a standard operating procedure (SOP) for {{process
name}} at a small law firm.

Cover:
1. Purpose and scope.
2. Who is responsible (roles).
3. Step-by-step procedure (ordered steps).
4. Required forms/templates and where they live.
5. Records and retention requirements.
6. Common mistakes to avoid.
7. Version and approval information.

Keep it simple and practical for a small firm. Use {{placeholders}} for names and specifics.
```

How to use: Adapt it to your real workflow and have the team review. *Verification step:* confirm the SOP reflects how your firm actually works and satisfies your jurisdiction's requirements for the process.

Prompt 7.2 — Draft a Client Communication Policy Outline

The AI drafts a firm-wide comms policy.

```
You are a legal operations assistant. Draft an outline for a client communication policy for a
small law firm.

Cover:
1. Standard response times for calls, emails, and urgent matters.
2. Who may communicate with clients and on what.
3. What must always be documented.
4. Privilege and confidentiality reminders.
5. Use of client portals and secure channels.
6. After-hours and emergency handling.
7. Handling of difficult or sensitive client conversations.
8. Record-keeping and file notes.

Output as a structured outline that the firm can flesh out. Keep it practical and firm-sized.
```

How to use: Flesh it out into your firm's actual policy. *Verification step:* confirm the policy aligns with your ethics and confidentiality obligations and is actually followed — a policy on paper is not a policy in practice.

Prompt 7.3 — Draft a File-Opening Checklist

The AI lays out a matter-opening checklist.

```
You are a legal operations assistant. Draft a file-opening checklist for when a new {{matter type}} matter begins at a small firm.

Include:
1. Conflict check completed and cleared.
2. Engagement letter signed and filed.
3. Retainer collected and deposited per rules.
4. Matter opened in case management system with correct billing rate and matter type.
5. Initial intake information recorded.
6. Filing/notification to the appropriate body if required (e.g., court, agency).
7. Client welcome and orientation sent.
8. Documents indexed into the file structure.

Output as a checklist with a checkbox for each item and a space for the responsible person and date.
```

How to use: Run it at every matter opening. *Verification step:* confirm it reflects your firm's procedures and your jurisdiction's requirements for trust accounts, engagement letters, and file opening.

Prompt 7.4 — Draft a Weekly Firm To-Do Digest

The AI aggregates tasks into a digest.

```
You are a legal operations assistant. Convert the following list of tasks into a clean weekly to-do digest for the firm.

Tasks:
{{paste tasks}}

Organize the digest by:
1. Urgent / deadline-driven items (this week).
2. High-priority items.
3. Routine / ongoing items.
4. Client-related items.
5. Administrative items.

Within each group, sort by due date. Flag anything that appears overdue with [OVERDUE]. Preserve all tasks; do not drop any.
```

How to use: Use this for firm standups and planning. *Verification step:* confirm all deadlines against your dockets and calendars — a task flagged not overdue by the AI may still be overdue in reality.

Prompt 7.5 — Draft a Technology / AI Use Policy Note for the Firm

The AI drafts a policy skeleton for AI use.

```
You are a legal operations assistant. Draft a policy note for a small law firm on the responsible use of AI tools (including large language models) in legal work.

The note should cover:
1. That AI is a drafting and research aid, not a substitute for attorney judgment.
2. That the responsible attorney must review and verify all AI output before use.
3. That citations, statutes, and legal propositions must be checked against primary sources.
4. That client confidential information must not be entered into consumer AI tools without a data-policy review.
5. That time-sensitive facts (deadlines, court dates) must always be verified independently.
6. That use must comply with the jurisdiction's ethics rules on technology competence and supervision.
7. Designation of who approves new AI tools (i.e., an official or a designated partner). Use {{placeholders}} where relevant.

Keep it firm-sized and practical.
```

How to use: Adapt into your firm's actual policy and have it reviewed. *Verification step:* confirm the policy reflects your jurisdiction's current ethics guidance on AI, and ensure staff actually follow it.

Matter Workflow End-to-End

Here is how the prompts and templates fit together into a complete matter lifecycle. This is the sequence to follow from first contact to closing.

Stage 1 — Intake

1. **First contact.** Use **Prompt 1.1** (intake interview script) or **Prompt 1.2** (intake summary from notes) to capture the initial conversation.
2. **Get documents.** Use **Prompt 1.4** (summarize client documents) and **Template 6** (document request checklist) to marshal what the client has.
3. **Run the conflict check.** Use **Template 2** (conflict-check intake note) through your firm's own conflicts database — never through the AI.
4. **Clarify gaps.** Use **Prompt 1.3** (follow-up questions) to fill holes before you commit.

Stage 2 — Engagement

1. **Draft the engagement letter.** Use **Prompt 1.5** (letterskeleton) and **Prompt 4.7** (closing paragraph), then have counsel finalize terms.
2. **Send the welcome.** Use **Prompt 5.5** (welcome packet cover letter), **Prompt 1.7** (welcome email), and **Prompt 1.6** (intake workflow checklist).
3. **Open the file.** Use **Template 1** (intake questionnaire), **Template 3** (matter intake summary), **Prompt 7.3** (file-opening checklist), and **Prompt 2.4** (file organization plan).

Stage 3 — Fact Development & Research

1. **Build the timeline.** Use **Template 4** (chronology builder) and **Prompt 2.2** (chronology from facts).
2. **Organize the team.** Use **Prompt 2.1** (matter overview) and **Prompt 2.5** (task & deadline tracker).
3. **Research the law.** Use **Prompt 3.1** (memo outline), **Prompt 3.2** (brainstorm avenues), and **Prompt 3.3** (case summary) to structure your research. Verify each authority.

4. **Draft the memo.** Use **Prompt 3.5** (memo body) from your verified authorities, then **Prompt 3.7** (sufficiency check) to pressure-test it.

Stage 4 — Drafting

1. **Draft the core documents.** Use the **Document Drafting** category — **Prompt 4.1** (demand letter), **Prompt 4.2** (contract skeleton), **Prompt 4.4** (pleading skeleton), or **Prompt 4.5** (opinion memo) as the matter requires.
2. **Summarize the evidence.** Use **Prompt 6.6** (merits/facts memo) to keep the evidence organized.

Stage 5 — Client Updates & Discovery

1. **Keep the client informed.** Use **Prompt 2.3** / **Prompt 5.1** (status updates) and **Template 5** (communication log).
2. **Run discovery.** Use **Prompt 6.1** (interrogatories), **Prompt 6.2** (requests for production), **Prompt 6.3** (privilege log), **Prompt 6.5** (exhibit log), and **Prompt 6.4** (deposition outline).

Stage 6 — Resolution

1. **Assess resolution options.** Use **Prompt 2.7** (settlement analysis framework) and **Prompt 4.3** (settlement agreement skeleton).

Stage 7 — Closing

1. **Close the matter.** Use **Template 8** (matter closing checklist) and **Prompt 5.7** (closing letter).
2. **Finalize finance.** Use **Template 7** (billing/engagement tracker) and reconcile the file.

> **Throughout every stage:** run the **Verification Checklist** (below) before you rely on anything. The workflow is a scaffold — your judgment, verification, and ethics obligations run through every step.

Verification Checklist

Before you rely on any AI-generated output, walk this checklist. If an item is unchecked, treat the output as unverified until you resolve it.

What to check	Why it matters	What to do
Citations	AI can hallucinate case names, reporters, and pincites.	Verify every citation against the official reporter or a trusted legal database.
Statutes & rules	Statutes get amended; AI memory goes stale.	Check the current, amended text in your jurisdiction's official code and court rules.
Jurisdiction	Law differs by state, court, and venue.	Confirm the rule applies in your exact jurisdiction and venue.
Dates & deadlines	Deadlines are live, high-stakes facts.	Confirm against the docket, court calendar, and your case management system.
Client facts	AI may misremember or embellish details you gave it.	Recheck every factual assertion against the file and the client's own materials.

What to check	Why it matters	What to do
Tone & audience	A draft may be too aggressive, too soft, or too legalistic.	Read it as the reader would; adjust to the client, opposing counsel, or court.
Confidentiality & privilege	Pasting client data into an AI tool can breach confidentiality.	Check your firm's data policy and the tool's terms before inputting anything.
Applicability of cases	A cited case may be distinguishable or overruled.	Confirm the case is still good law and on point (Shepardize/KeyCite).
Contract/court-form compliance	Courts and deals have specific formatting and content rules.	Check against the court's local rules or the deal's requirements.
Logical completeness	Drafts often skip a step or a counterargument.	Check that the document addresses all elements and objections.
The human review	No AI output is "final."	A licensed attorney must review, correct, and approve before anything is used or sent.

Frequently Asked Questions

Q1. Is this pack a substitute for a lawyer?
No. This pack is a productivity aid for licensed legal professionals. The AI drafts; a qualified attorney must review, verify, and approve every output. Nothing here is legal advice.

Q2. Can I use these prompts with any AI tool?
Yes — the prompts are tool-agnostic. But before you paste client information into any tool, check the tool's privacy and data terms and your firm's data policy. Prefer professional-grade, confidential tools for client work.

Q3. What if the AI gives me a citation that looks real but is wrong?
That is exactly what you must guard against. Treat every citation as unverified until you check it against the primary source. The Verification Checklist in this pack walks you through it.

Q4. Are the templates compatible with Notion?
Yes. Every template is a fill-in table or structured form that pastes cleanly into Notion, your CRM, or your case management system. The Format is PDF + Notion — paste the blocks in and adapt.

Q5. How many prompts are in this pack?
This pack contains **52 prompts** across 7 categories, plus 8 intake and matter-management templates. That comfortably exceeds the advertised "45+ prompts."

Q6. Can I use these prompts for any practice area?
The prompts are written to be practice-area neutral. Customize the `{{practice area}}` and `{{matter type}}` placeholders for family law, criminal, corporate, real estate, personal injury, or any other field.

Q7. Do I need to disclose my use of AI to clients?
That depends on your jurisdiction's ethics rules. Many jurisdictions are beginning to require disclosure of AI use in certain circumstances. Check your local rules and your firm's policy, and disclose where required.

Q8. Are the templates and prompts a guarantee of results?
No. No tool can guarantee a legal outcome. This pack improves your efficiency and consistency — it does not change the merits of a case or the law.

Q9. The subtitle mentions verification. Is that just for show?
No. Verification is the core design principle of this pack. Each prompt instructs you to check citations, statutes, dates, and facts. The "Responsible Use & Verification" section at the top is mandatory reading.

Free Lifetime Updates

Every future version of this pack is yours. As new prompts are added, categories are expanded, and templates improve, you will receive every update at no additional cost — for as long as you own this product.

How it works:
- Updates are delivered to your Gumroad library automatically.
- You will be notified when a new version is published.
- You can always re-download the latest version from your purchases page.

Why we promise this: The law changes, tools change, and best practices evolve. We keep this pack current so it stays useful for years — and you never pay twice.

We also welcome your feedback. If there is a prompt or template you would love to see, tell us — it may appear in the next update.
